Mr. Arafat was said to have all the parties involved in the fighting and ask for a cease-fire.

This city has long been con-trolled by powerful armed factions, and the man heading the dominant Tripoli militia, Sheikh Sayed Shaaban, although present, left others confused about his intentions.

Sheikh Shaaban, an anti-Syrian Sunni Moslem fundamentalist, is an ally of Mr. Arafat. He has sent fighters to aid PLO loyalist forces on Turbol mountain and suggested strongly he might come to Mr. Arafat's aid if fighting broke out in

In the last couple of days, Sheikh Shaaban's militiamen in the Islamic Unity Movement have launched

troops in barracks in the city.

The civic leaders also planned to contact a leader of the PLO rebels. Colonel Sayed Abu Musa, and were trying to arrange a meeting with President Assad.

Mr. Assad has said that Syria is not involved in the Palestinian fighting, but it is clear for sayoue in between Syrian gun positions south and east of Tripoli that they are the source of multiple rockets and artillery being fired into the lower slopes of Turbol mountain and on Arafat rocket positions along Tripoli harbor.

The Vatican, responding to an appeal from Mr. Arafat, called for

"dialogue and negotiations." Sources close to the Tripoli conmittee told The Associated Press they had made contacts with Colonel Musa arging the cease-fire but his condition was that "Arafat should either get out or face a court-martial before a revolutionary court."

PLO: Splintered Future

Whether Arafat Survives Battle or Not, Analysts See Long Period of Disarray

Mr. Arafat appeared to litical leaders of the PLO or change ignore signals of discontent and internal policies. In late 1982 and in 1983, PLO In April, he opened negotiations

> The negotiations appeared to have greatly frightened President Hafez al-Assad of Svria, who has always claimed the right to speak on behalf of the Palestinians in any Arab-Israeli negotiations. It was during the Arafat-Hussein talks that the Syrian press first ventured so far as to label Mr. Arafat a

At the culmination of the talks, Mr. Arafat refused to give Hussein the PLO mandate he sought to negotiate with Israel on the Reagan nitiative. Mr. Arafat was reportedly afraid that such a move would solit the PLO and that he would get little in return.

Many Arab analysts and diplomats say this was Mr. Arafat's greatest political blunder because the PLO was split anyway over the Reagan plan, only instead of being split on Mr. Arafat's terms, it was split on Syria's terms.

Syria's leaders were apparently so disturbed by how close the Arafat-Hussein talks came to an agreement on the U.S. plan that they decided to bring Mr. Arafat under their control.

Mr. Arafat gave the Syrians a perfect opening in May, only a few weeks after the Amman talks, when he appointed two of his associates, both of whom had reputations for corruption and cowardice in hattle, as senior commanders of the forces of el-Fatah in the Beksa, Leba-

non's eastern valley, Fatah is Mr. Arafat's own guerrilla group in the PLO. This started what appeared then to be a spontaneous revolt led by Colonel Sayed Ahu Musa and a few other senior PLO officers. As soon as it began, pro-Syrian elements of the PLO threw their men behind the dissi-

up strength, always driven by the twin propellers of Syrian military assistance and increasing discontent with Mr. Arafat's leadership. Mr. Arafat's supporters were driven out of the Bekaa into the (Continued on Page 2, Col. 1)

WORLD BRIEFS

O'Neill Sends Apology to Mrs. Reagan

WASHINGTON (AP) — The speaker of the House, Thomas P. O'Neill, has written a personal apology to Nancy Reagan for his remarks about how she could become "queen of Beverly Hills" if her hashand chose not to continue as president.

A spokesman for the speaker confirmed Tuesday that Representative O'Neill apologized to Mrs. Reagan in a personal note, Last week in The O Near appropried to Mrs. Reagan in a personal note. Last week in The New York Times, Mr. O'Neill expressed dismay with Mr. Reagan's foreign policy and work habits, and added: "He could quit tomorrow and she would be queen of Beverly Hills."

Kohl Assails Soviet Nuclear Policy

BONN (Reuters) - Chancellor Helmut Kohl accused Moscow Tuesday of pursuing a policy of nuclear supremacy and political expansionism as he opened a major counteroffensive here against opponents of NATO's deployment of new missiles.

Addressing an international conference on "Europe's responsibility for peace." Mr. Kohl also defended the Western nuclear deterrent as the only uscantor of peace. He told 300 delegates that to avoid opening itself to blackmail Western Europe could not accept a Soviet monopoly in landbased medium-range nuclear weapons.

The Soviet Union wants to threaten us Europeans and at the same time stop the United States from protecting us," he said. The congress is the main one in a series being organized by Mr. Kohl's Christian Democratic Union to counter the widespread campaign against NATO's deployment in Europe from next month of Pershing-2 and cruise missiles. In Rome, the Italian defense minister, Giovanni Spadolini, said Tuesday that U.S. cruise missiles slated for Italy will be temporary installed at a navy air station at Sigonella, Sicily, before being transported to a nearby NATO base for permanent deployment. He did not say when the missiles

Angolan Air Crash Reported to Kill 150

LISBON (AP) - A Boeing 737 sirliner of the Angolan national carrier TAAG crashed shortly after takeoff Tuesday from Lubango in the African nation's Huila province, the Angolan news agency reported. The Angolan agency ANGOP, monitored here, gave no word of casualties. But the Yugoslav news agency Tanjug said all 150 passengers and crew members on the plane, on a regular flight from Lubango to Lusanda, had been killed. Tanjug, monitored in Belgrade, said all those should were believed to be Angolans.

aboard were believed to be Angolans.

ANGOP quoted airline officials in Luanda as saying the plane crashed about 100 meters (110 yards) from the end of the runway at Lubango.

Flynt Ejected From Supreme Court

WASHINGTON (AP) — Larry Flynt, publisher of Hustler magazine, was forcibly removed from a Supreme Court session Tuesday after he

screamed obscenities at the justices. The outburst occurred just as the court concluded hearing armuments in a case in which Kathy Kecton, vice president of Penthouse, a competing magazine, contends she was libeled by Mr. Flynt's publication. The court had rejected a request that Mr. Flynt be allowed to represent

Mr. Flynt continued shouting at the bench as Chief Justice Warren E. Burger told an assistant marshal to remove him from the court. A court spokeswoman said Mr. Flynt had been arrested and charged with

Black Is Front-Runner in Philadelphia

PHILADELPHIA (NYT) - Philadelphians were expected to elect their first black mayor Tuesday in one of the most widely watched of the elections scattered across the United States. W. Wilson Goode, a Democrat and a former city managing director, has a commanding lead in polls. Voters were to elect governors in Mississippi and Kentucky, fill two seats in Congress vacated by the deaths of incumbents and choose mayors

in several major cities. In Washington, former Governor Daniel J. Evans, a Republican, is running for the Senate seat to which he was appointed two months ago after the death of Henry M. Jackson, a Democrat. In Georgia, woters will choose a successor to Representative Larry P. McDonald, a Democrat, who was aboard the South Korean airliner shot down Sept. I by a Soviet fighter. Katherine McDonald, his widow, is running against state Representative George Darden, another Democrat.

Senate Votes Nerve-Gas Production

WASHINGTON (AP) - The Senate approved, 47 to 46, on Tresday the production of new nerve-gas weapons, as Vice President George Bush cast the deciding vote. The House earlier rejected the \$124-million program. But the Senate's

decision followed arguments by President Ronald Reagan that the nerve gas bombs and artillery shells should be produced to prod the Soviet Union into a negotiated reduction of chemical stockpile The Senate Appropriations Committee had sided with the House and

recommended blocking nerve-gas funding and continuing the 14-year freeze by the United States on the production of chemical weapons. But John Tower, Republican of Texas, chairman of the Senate Anned Services Committee, successfully moved to restore money for the weapons. A conference committee will now have to negotiate the difference between the House and Senate on the issue.

For the Record

Belgian Socialist trade unions staged a token 15-minute "peace strike" Tuesday as parliament began debating NATO plans to deploy new U.S. medium-range nuclear missiles in Western Europe. (Reuters)

Dutch Labor Disruptions Center on Welfare Cuts

(Continued from Page 1) 160 billion guilders, according to

When it announced the budget in September, the government said the Dutch economy had "derailed" and the only way to put it back on track was to cut down drastically on public spending by reducing so-cial welfare benefits and public investments, to strengthen the pri-vate sector through tax breaks and other investment-inducing measures, and to reduce memployment by work-sharing.

The unions say they accepted the

Foreign observers thus see a sharpening conflict between the government and the unions and predict a widening of the strikes.

Most of the government's critics or 10 years.

Although a socially TiberatNortherlands has tem will remain one of the most highly developed institutions of its kind even if the 3.5-percent reduction in benefits is carried out.

"Nobody here will go hangry and no one is without a roof," said a leading editor in Amsterdam adding that the poorest and weakest members of society will still be taken care of. The shock of the new policies, he said, was that a lot of people who had been comfortably off were likely to see themselves pushed down close to the lowest evel of the social scale.

We'll have a lot of what someone has called 'doctors' widows' -divorced wives and widows of independent professional men who did not make sufficient social security provisions and to whom the system will not be kind." He added that a lot of teachers and intellectuals would lose their jobs as schools, universities and research institutes felt the reductions, and that tens of thousands of social workers and hospital employees would be laid

WASHINGTON - The Supreme Court, expanding its exami-nation of libel law, has agreed to decide whether the constitution protects nonmedia organizations ainst libel suits by private individuals to the same extent that it protects the press.

The question has been a source of confusion for years and has been widely regarded as overdue for clarification. The justices Monday accepted an appeal by Dun & Bradstreet, Inc., from a ruling of the Vermont Supreme Court that concluded that the financial reporting service was not entitled to the shield against punitive damages in Airline Pilots to Forgo Raise prices to voluntarily return some of the overpayment. Or it can bring a tem for governmental licensing of the overpayment. Dun & Bradstreet, which offers

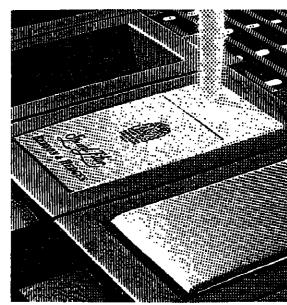

financial analysis to private clients, is not claiming to be part of the press. Rather, it is arguing that there should be no distinction between the potential exposure of media and nonmedia libel defendants to punitive damages.

The company was sued in 1976 after it erroneously advised its cli-

The Euromissile Dance

The approaching December date for deploying U.S. medium-range missiles in Europe which carry 1,800 warheads. Again, not all are has concentrated Moscow's mind. It has elicited Soviet threats to make the present Geneva tango the last and to move missiles of lesser range into Eastern Europe. It has evoked a flood of Soviet propaganda about trigger-happy Americans in Grenada. And it has brought yet another arms control proposal from the Soviet leader, Yuri Andropov.

Unfortunately, Mr. Andropov still insists that his mobile SS-20s in Europe justify no matching U.S. force. That, for now, makes any deal unlikely. But if that hurdle is ever crossed, the new Soviet proposals give some promise.

Mr. Andropov says he is willing to hold the SS-20 launchers in Asia at 108. He meets President Reagan's offer to negotiate about medium-range bombers by hinting at compro-mise. And he finally acknowledges that the 162 missiles possessed by Britain and France might be balanced by fewer than 162 Soviet launchers. He suggests reducing the 252 SS-20s aimed at Europe to about 140.

Moscow's prior demand for some kind of "equality" with Britain and France has been its most effective - and misleading - argument. With three independently targeted warheads, 140 SS-20s could hit 420 targets.

But what really is the British and French capacity? Moscow sometimes lists three warheads for Britain's Polaris missile, but these cluster bombs can only hit one target, as the SALT-2 treaty recognized. And 144 of the British and French missiles are submarinebased: sewer than half are operational and within range at any time. In fact, 30 SS-20s at most could match them. More properly. British and French submarine missiles should be

in range at any given time.

But in any case, if multiple-warhead missiles raise the British and French arsenal toward 1,000 warheads in a decade, as planned, they almost certainly will have to be brought into the Soviet-American arms control process. By seeking excessive compensation for British and French forces now, Moscow is using a pretext to bar American missiles from Europe to assure itself a huge regional advantage.

And the purpose of that is political: to divide NATO by decoupling West Germany and other nations not defended by the British and French weapons from the American nuclear shield.

A Soviet regional advantage counted for little in the 1960s, when the strategic superiority of the United States protected Europe. But strategic parity has since changed perceptions; there can be doubts whether Americans, unless engaged on the Continent, would risk all-out war to defend Europe. Hence the NATO decision in 1979 to balance the SS-20s with 572 cruise and Pershing-2 missiles unless parity at lower levels could be negotiated.

Moscow is betting on Europe's anti-nuclear movement to upset the alliance's resolve. But the North Atlantic Treaty Organization can finally begin deployments and still leave time to freeze them at a modest level. What Moscow might note is that reversing the Pershing-2 deployment - its major objective - will be harder than forestalling it now, as the Europe-ans believe still possible. A better Soviet offer in the next two months could save everyone from a year or two of tense diplomacy.

— THE NEW YORK TIMES.

Rangoon Speaks Out

From Burma, a place whose passages go unnoted by most Americans, comes a cheering example of stalwart international conduct. The scene a month ago of a bombing that nearly wiped out the visiting South Korean leadership, Burma has stood up to be counted in circumstances where it might well have

looked the other way.

Burma is something of a hermit state, though less so in recent years than it had been. Few would have been surprised if the Burmese, in their tradition of supple nonalignment, had simply let the official investigation of the bombing drag on and culminate in a toothless report some months or years down the line. Plenty of ostensibly more involved nations have shied from dealing forthrightly with terrorism on their soil. Instead, the Burmese. after a four-week investigation, "firmly established" North Korea's responsibility for the trime, said so and closed down the offending country's embassy. Outrage and pride evidently led Rangoon to do the right thing.

South Korea had already been urging other noncommunist countries with ties with North Korea to break them off in retaliation for the Rangoon bombing. Since what Seoul calls "retaliatory diplomatic measures" are much to be

preferred over more direct and forceful responses, and since South Korea has truly been abused, it is difficult to take issue with its appeal. Still, no one should pretend that further isolation will likely lead the odious North Korean regime to change its character. Eventually - probably this will be possible only when its leadership changes — ways will have to be found to draw this rogue state into civilized international company.

As it happens, President Reagan is about to visit South Korea. Despite the recent attack in Burma, the Korean peninsula is relatively quiet these days: Moscow and Beijing on one side and Washington on the other have been attentive in their respective ways to the requirements of regional stability. Mr. Reagan no doubt will want to assure the South Koreans of the United States's continued solicitude for their security and well-being. He should want to hear from them assurances of their continued patience and restraint. A quiet discussion on South Korea's plans to improve its performance in human rights is also in order. The more it can distinguish itself from North Korea, the closer its links with friendly democrat-

— THE WASHINGTON POST.

A Quiet Visit to Japan

President Reagan's trip to Japan will com-plete his circuit of the principal U.S. allies and trading partners in Asia. There is not much serious negotiation to be conducted. The journev is essentially a gesture. But the gestures of Over the past generation, the international international politics, the expressions of common interest and concern, often carry more weight than the matters of substance over which negotiators struggle endlessly.

One virtue of presidential trips is that they usually induce governments to settle outstanding issues to prevent them from clouding presidential discussions. The long wrangle over the fourth year of quotas on imported Japanese cars was concluded last week -- bad economic policy, but at least a temporary removal of a longstanding irritant. As for defense, that perennial item of Japanese-American agendas, Mr. Reagan hardly has to mention it.

Recent events, from the incautious Soviet comments on missiles to the attack on the South Korean airliner to the assassination of the South Korean leaders in Rangoon, make the case for a well-maintained alliance more forcefully than an American president can.

If Mr. Reagan's several days in Tokyo are serene to the point of boredom, both Americans and Japanese ought to take that as the reward of much hard work over many years. economic system, over which the United States presides, has proved sufficiently flexible and farsighted to accommodate the rapid rise of a great new industrial power.

That has not happened often in the melancholy history of the modern world without dangerous political strains and sometimes war.

Recollections of World War II are never very far in the background of American-Japanese political conversations. But the tone of those conversations, as they go forward currently, is evidence that both countries have reflected deeply on those terrible years.

The most useful trips are often the least newsworthy. A truly dull trip means that careful preparations have left nothing to the people at the top but presence and photographs. It is not an obvious kind of international triumph, but it should not be overlooked.

- THE WASHINGTON POST.

Setback for the Generals

Sunday's legislative elections in Turkey can only be considered as a pseudo-democratic non-event; fundamentally, the regime will remain military, But despite the regime's pre-election precau-

tions — the banning of former political figures, suppression of new political groups, preselection of political candidates, and General Evren's attacks on the victor, Turgut Ozal -

the voters inflicted a blow to the generals. Doubtless, the Turks, voting again just one year after the plebiscite that endorsed General Evren, wanted to say that the time had come for the army to return to the barracks and the country to civilian rule. But did General Evren, who holds the keys to power in Turkey to dissolve parliament, appoint high-ranking officials and impose or lift martial law — get

1908: Protest in Turkish Town CONSTANTINOPLE - The Minister of the

Interior has just received a telegram from Gumuljina, near Adrianople, informing him of serious disturbances there yesterday. A hodja who had spoken against the Constitution was condemned to a slight imprisonment, but the imams, hearing of the judgment, took the holy hanners from the mosques, massed some 10,000 Musulmans and marched to the courthouse, where they protested against the electoral illegalities. They entered the town hall. and seized and beat the military governor. The their houses at the mercy of the mob. It is feared there will be bloody encounters with the crowd, which has been excited against the new regime by reactionaries.

1933: 20 Dead in Cuban Revolt HAVANA - For the second time since Dr.

Grau San Martin became provisional president of Cuha. Havana shook under shellfire today, when the ABC, a secret political society. supported by the army air corps, launched a determined revolt to reinstate former Presi-dent Manuel Carlos de Cespedes. The fighting has claimed 20 lives, while scores of persons, including pedestrians, are reported wounded. The fighting began before dawn when a group of planes under Captain Guillermo Martuil raided the city, clearing the streets and terrorizing the populace. President Gran San Martin issued a statement in which he declared the government had been victorious "over the criminal attempt to destroy the legitimate aspirations of the Cuban people."

The Growing Threat of Famine in Africa

ROME — While some people in the Northern Hemisphere are kept awake by distant visions of destruction in a nuclear war, a nightmare has already begun for millions of Africans.

People in at least 22 sub-Saharan countries are facing food shortages, which, if not overcome within six months, will result in famine far greater than that experienced during the Sabelian

food crisis a decade ago.

The current shortage threatens two of every five Africans south of the Sahara. Several countries in Southern and Eastern Africa are facing their third consecutive season of poor harvests. The main cause is two successive years of severe drought. Insects have severely damaged crops in the cassava belt from Senegal to Mozambique, while outbreaks of rinderpest, an acute infectious disease affecting cattle, are taking a heavy toll. Bush fires have scorched Western Africa. and war and civil strife have disrupted farming in many areas. Many of these countries are landlocked, and transport and communications

Throughout the 22 countries the story is the same. The 1983-84 barvest, at under 14 million tons of cereal grains, will be almost a quarter of that of two years ago. It has been more than 10 years since food production has kept up with population growth in Africa.

În Ghana, Mauritania, Mozambique and Senegal, stocks held by governments, private traders and farmers are nearly exhausted. Already, we have received reports from Mozambique of the

first deaths from starvation.
Following the Sahel crisis of 1973-75, the United Nations Food and Agriculture Organization set up a global information and early warning system to give advance notice of potential By Edouard Saouma

The writer is director-general of the Food and Agriculture Organization of the United Nations.

food shortages. This, together with improve-ments in administrative and distribution structures, has increased the chances of getting food to the hungry in time.

The grace period is, however, disappearing

Increasingly grave reports prompted me in April to establish a task force to review and monitor the food and crop situation in African countries threatened by abnormally low food production. On May 6, I appealed for extra food aid and other assistance for these countries. Prospects for the 1983-84 harvest became

worse as the year progressed. In August, satellite pictures showed that the so-called Green Belt, which normally appears across the Sahei during the most critical period of the growing season, had moved south by an average of 200 kilometers (124 miles), leaving a huge and normally productive area parched and useless. On Oct. 19, I convened a special meeting in

Rome of the 22 affected countries, 35 donor countries and international organizations in an attempt to speed delivery of existing aid commitments and to find ways of providing extra assistance. A report prepared for the meeting recom-mended that the 22 countries be provided with a minimum of 700,000 tons of food aid over and above the previous year's requirements. It also said that \$76 million was needed to supply essential inputs for food production, for measures to control animal disease, to rehabilitate agriculture after the emergency and to distribute food.

The 22 countries' minimum cereal import needs for the 1983-84 growing season are estimated at 5 million tons. Imports during the 1982-83 season totaled 3.3 million tons, 1.8 million of which were accounted for by commercial imports. Shortages of foreign exchange make

any increase in this figure extremely unlikely. Deliveries of food aid will need to be more than twice the 1.5 millions tons of the previous year if the countries are to achieve the target. Despite the downturn in U.S. grain produc-

tion due to drought, world reserves are adequate to meet African import needs. Cereal prices are, however, significantly higher this year, which may add to problems in the months ahead.

Many things need to be done in these and other food-deficient countries. They have got to take a fresh look at national efforts, mobilize their own resources, streamline local transport and improve other logistics.

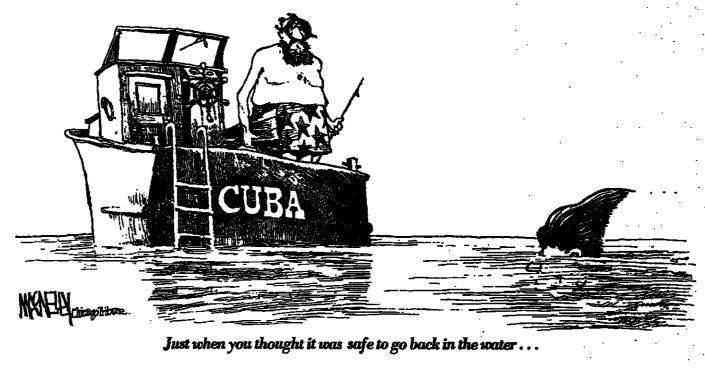

Over the long run, they must give higher priority to food production and pay more attention to the poorest people - the subsistence farmers, landless laborers, nomadic pastoralists and the women and children who make up the bulk of Africa's poorer population.

in the short term, a major international effort is needed to stave off widespread famine in

Africa in the coming months. I have, therefore, called on donor countries to meet here in Rome on Thursday. I will urge them to speed deliveries of food and aid already pletiged, which currently amount to about 25 percent of requirements. I will also ask them for specific pledges to increase contributions of food and cash over what had been promised.

I sincerely hope and trust that they will respond with adequate help in this urgent and critical situation.

International Herald Tribune

On Grenada: The Injury to British Pride Was Not Fatal

LONDON — Margaret Thatcher does not reflect the British character in one important respect. She dislikes ambiguity, a quality that lies at the heart of many of our institutions — not least the monarchy and the Commonwealth — and that has hovered over the Grenada imbroglio.

At the start of the Falklands crisis last year, when Alexander Haig was in London to begin his attempt at shuttle diplomacy, he put forward ideas for a negotiated solution that objection on that score, the U.S. secretary of state retorted that in the circumstances he saw virtue in "certain constructive ambiguities." was soon to find out that Mrs. Thatcher is not attracted by such

Her insistence in clarifying her attitude beyond all shadow of a doubt turned the Grenada issue into a trans-Atlantic row and compounded her problems within her own party and with sections of the British public opposed to the deployment of

Initially she had taken the line that while she had advised President Reagan against invading Grenada, she recognized that the U.S. government saw things differently. But later her line hardened: Western countries did not use force "to walk into other

people's countries." Foreign Secretary Geoffrey Howe also moved nearer to condemnation, saying that the invasion was not justified on the grounds of danger to American citizens or of the Cuban-Soviet presence. These remarks gave rise to aston-ishment in the United States. Where

was the gratitude for U.S. support for Britain over the Falklands' I do not believe that these speeches

of the prime minister and foreign secretary marked the opening of a campaign to denigrate the Americans. Mrs. Thatcher is apt to be carried away in pursuit of clarity and principle. Sir Geoffrey Howe is a lawver, and as such brings legal qualities to the conduct of foreign policy. Subsequently in Parliament, where he is under heavy attack from his own party, he was more conciliatory, emphasizing support for any Common-wealth initiative in Grenada.

I believe that Grenada's membership in the Commonwealth and the queen's role as head of state of Grenada lie at the root of the problem. Had the United States invaded some small non-Commonwealth country in the Caribbean there would have been protests in Britain (as elsewhere), but not with the same intensity, not with the same sense of injured pride. Not that the role of the queen or the involvement of the Commonwealth is at all clear to most people.

Grenada is not British, nor is the governor general. He will not be seen in a plumed hat. The British government has no responsibility whatever for the island.

The queen is queen of Grenada and appoints the governor general on the advice of the government of Grenada. But having made the appointment, she has devolved all powers upon him. He is under no legal obligation to consult the queen on the running of the government or country. When the constitution is paralyzed, as it has been, the governor general has the right and duty to do what he can to restore and upbold it; By Sir Nicholas Henderson

to do as he pleases.

The Commonwealth consists of 48 sovereign independent countries, 25 of which are republics, some of which have their own monarchs. The only two things that all members of the Commonwealth have in common are that they have been, in some degree, campaigning here against the deploy-dependent on the United Kingdom, ment of cruise missiles. dependent on the United Kingdom, and that they all acknowledge the queen as head of the Commonwealth.

But this role is symbolic. The extraordinary thing is that despite all these ambiguities and despite the fact each member is independent, the Commonwealth does mean something to all of them. In those countries that recognize the queen as head of state there is a particular connection. When, for instance, the queen recently visited Jamaica, she said how appy she was to be at home.

I think that it is an awareness of this indefinable quality that has given rise in Britain to some of the concern aroused by the U.S. invasion of Grenada — a slight sense of pique, a faint feeling that others should understand the Commonwealth and the queen's role, however intangible.

Regrettably, the way this matter has been handled has played into the hands of those who are anti-Ameri-

learned something from the disasters of Suez. Alexander Haig said to me during the Falklands crisis that we repeat the error of Suez when they pilloried Britain for its action.

What should emerge from these latest events is the creation of some system of automatic consultation between the two sides of the Atlantic. NATO deals with the North Atlantic area. Many of the thorniest problems that most directly affect our interests occur elsewhere. If some such process could be evolved. Grenada could have provided a positive stimulus to the course of international life.

Breakthrough Reported In U.S. Fusion Research

By Lee Dembart

Los Angeles Times Service LOS ANGELES - Plasma physicists at the Massachusetts Institute of Technology have achieved the first confinement of superheated gas sufficient to produce a self-sustaining fusion reaction, which could someday provide an inexhaustible form of energy.

For the first time, scientists have shown that it would be possible to produce more energy in a fusion reactor than is needed to start the reaction going

"This ranks as the most distinguished accomplishment in fusion research," Harold Furth, director of the Princeton Plasma Physics Laboratory and one of the leaders in the field, said at a news conference Monday at which the achievement was announced.

"The finding gives us increased confidence that fusion ultimately will be a practical energy source, said Ronald Davidson, director of the MIT plasma fusion center. The breakthrough was achieved at the center Thursday with the use of the institute's Alcator C reactor, a doughnut-shaped machine called a

Whether a self-sustaining fusion reaction will ever be achieved and whether it will be commercially viable even if achieved remain unanswered questions. The U.S. government this year is spending about \$470 million on fusion research. and no one expects to see a commercial fusion reactor before the next century, if ever.

If it can be done, however, the rewards would be enormous. In a fusion reaction, nuclei of hydrogen for its isotopes, deuterium and tritium) are forced to fuse, resulting in the release of large amounts of energy. That is the reaction that fuels the sun and other stars as well as the hydrogen bomb. Making the reaction occur under controlled

energy research for more than 30

Deuterium is abundant in the world's oceans and readily extractable. Tritium can be made in the reactor. One gram of deuteriumtritium fuel can produce as much energy as 45 barrels of oil.

For the reaction to take place, temperatures of more than 100 million degrees centigrade (180 million Fahrenheit) are required. Temperatures in that range were first achieved in 1978 on a machine called the Princeton Large Torus.

Confining any matter at such a high temperature is a prodigious task. When a gas is heated that high, the electrons of its atoms are stripped off, creating an electrically charged plasma, which can be held in place by a magnetic field. The quality of the confinement - how well the plasma is contained - is measured by a number called the

Lawson product.
What the MIT researchers did was to achieve a Lawson product high enough to have created a selfsustaining reaction if the temperature had also been high enough. A self-sustaining reaction is called "break-even." No such fusion reaction has yet been achieved.

In fact, the temperature that the MIT group worked at was only 15 million degrees centigrade.

"We have to raise the tempera-ture," Ronald Parker, leader of the Alcator C team, said. "We don't anticipate large problems in doing

The next step, raising the temperature and maintaining the highquality confinement, will probably be done at the Tokamak Fusion Test Reactor at Princeton, the largest fusion device in the United States, which was put into operation in December.

The MIT group used only deuterium in achieving the Lawson criterion for break-even. The Princeton people will use deuterium and tritium. Their goal is to demonstrate conditions has been the goal of break-even by 1986.

'Star Wars' Anti-Missile Systems: U.S. Scientists Tilt For and Against

By Charles Mohr

New York Times Service

WASHINGTON — A group of experts has urged President Ronald Reagan to order an increase in long-range research on exotic technologies to defend against a nuclear attack.

Government officials said the president was expected to follow the advice by a Pentagonappointed panel of technologists and give priority to still-remote technology, rather than undertaking a crash program to deploy actual defensive weapons quickly. Some members of Congress have recommended a deployment pro-

Many scientists outside government have expressed doubt that any combination of technologies would provide a workable defense against nuclear missiles. But the technologists' panel, called the Defensive Technologies Study Team, is more optimistic about the long-term prospects, officials said.

The recent recommendations to the president would substantially increase an already ambitious spending plan that was under consider-ation before Mr. Reagan called for study of a high-technology anti-missile system in his socalled "Star Wars" speech on March 23, the

Although some of the proposed systems might be based in space and use directed energy such as lasers or particle beams, officials said the study team did not confine itself to spacebased methods in its report to the Defense Department and the White House.

Middle Course

In terms of military research and development, the study team's advice to the president takes a middle course. It rejects pressures from those who believe a defense can be built quickly from available technology. But it also rejects a larger body of strategic and scientific thinking that nuclear defense is not a wise goal and that only moderate research efforts should be continued to avoid a technological surprise by the

Some prominent scientists outside adminis-tration policy-making circles said they were very skeptical of the technical feasibility of such systems and even more dubious about the strategic and political wisdom of seeking to build

Hans Bethe of Cornell University, a Nobel laureate who was director of theoretical physics for the Manhattan Project in World War II. said: "My opinion is that it is still totally science

Critics 'do not show that all that we are doing is useless, but only that we are not completely successful as yet and that further improvements are highly desirable.'

- Edward Teller

Mr. Reagan argues that such a system could render a "system of horrible weapons obsolete," reference to offensive intercontinental missiles. His critics contend that it would only spur the Soviet Union to increase its stock of missiles

and to undertake complex countermeasures. "No matter how bad things are now, they can get worse," said Henry Kendall, a physicist at the Massachusetts Institute of Technology and chairman of the Union of Concerned Scientists.

On the other hand, the practicability and desirability of anti-missile systems have been strongly championed by such figures as Edward Teller, leader of the team that developed the hydrogen bomb, and Lowell Wood, a prominent scientist at the Lawrence Livermore National

"I am not telling you that we have complete plans," said Mr. Teller. "If we did, we would for deployment rather than more re-

The scientists on the Defensive Technologies

ment and deployment of the weapons, officials stressed, but a prolonged research effort with periodic demonstrations of technology feasibil-ity. The team was headed by James C. Fletcher, former administrator of the National Aeronau-

Robert S. Cooper, director of the Defense Department's Advanced Research Projects Agency, said the Fletcher panel had been charged with giving greater consideration to advanced technologies that could lead to workable weapons "by the late 1990s."

Several officials said many of the technologies were so "immature" that it was difficult to estimate what production might cost. Some said the Fletcher panel's recommendations might lead to an increase of \$500 million to \$1 billion in research spending for the 1985 fiscal year, which starts next Oct. 1. Expenditures of \$18 billion to \$27 billion over five years are being

According to Defense Department officials,

draft for this type of research for 1985 even before Mr. Reagan's March speech. Early plan-ning for the next five-year military budget discussed expenditure of \$10 billion to \$20 billion on strategic defense.

Kurt Gottfried, a Cornell physicist and a member of the Union of Concerned Scientists. called the proposed expenditures "a prodigious amount of money.

Another potential controversy involves the probable effectiveness of any defense against nuclear missiles. Mr. Reagan's speech put forth a vision of a highly effective screen that might almost eliminate civilian casualties. Many government experts and some members of the Fletcher panel think that, under the best circurrentances, many civilians would be killed or

Mr. Cooper of the Defense Department gave what is increasingly a standard administration response. "Even if only 50 percent of all incoming missiles were stopped," he said, "the Soviets uld then have no confidence in the success of Study Team did not recommend actual develop- nearly \$2 billion was put in the early budget a first strike, and war would be more remote."

accomplished some

Because the technologies and strategic doctrines under discussion are complex, so is the debate about their technical feasibility and mil-

research leading to a three-tier system that would be able to attack Soviet missiles first as rocket motors were lifting them through the atmosphere. This would be followed by interception in mideourse as the re-entry vehicles coasted above the atmosphere, and then by final defense as the re-entry vehicles plunged back into the atmosphere over the United States.

Because the missile boosters are much more vulnerable to damage from lasers or other technology than the heat-resistant and hardened warheads, interception in the boost phase is

Laser "battle stations" could be placed in technology this would be the most plausible course, experts say.

But the Earth's rotation would make it neces-

sary to have more than 100 stations orbiting to keep a number of lasers over Soviet territory, according to Mr. Bethe. Moreover, critics argue, all defensive systems would need to be defended themselves against possible pre-emptive attacks, and this is harder to do in lower orbits.

'Pop-Up' Weapons

An alternative would be to place directedenergy stations so they would hover over Soviet territory in an orbit that would keep them 22,300 miles (35,900 kilometers) directly above points on the Earth.

To put heavy battle stations in such high orbits, however, would require very powerful rockets, Mr. Bethe said. Moreover, he said, releasing X-ray lasers at such altitudes would remire the detonation of a nuclear device of "at least one megaton." Radiation from the nuclear explosive would cause material in a bundle of rods orbiting some distance away to emit a powerful beam of X-ray energy.

The Fletcher panel report placed great emphasis on X-ray lasers as perhaps the most promising future technology to block hostile

But critics argue that the enormous distance to the Soviet missiles would complicate the dannting problem of accurate pointing and

Mr. Teller argued that if the Russians were forced to increase expenditures greatly to ensure alternative concept in which the anti-missile that their missiles got through, we would have systems would be kept on the ground but prepared for immediate launching into space. In one such "pop-up" plan, the rockets would be kept ready for instant launching; in another, large mirrors for focusing laser beams would be sent into space, where they would gather and

The Fletcher panel reportedly recommended point energy from ground-based lasers. The problems that must be overcome to make pop-up weapons effective are staggering, critics say. In a modern intercontinental missile like the American MX booster rockets burn foronly about three minutes. After early-warning sensor satellites flashed word that a Soviet. launching had begun; the pop-up weapons or mirrors would have to be sent aloft almost instantaneously. -

Soviet Countermeasures

According to Richard L. Garwin, a Defense Department consultant, the rockets would have to move at tremendous speed to lift the defenrelatively low orbit, and with foreseeable rocket sive devices to altitudes of 1,000 miles or more in less than three minutes so they could attack the Soviet boosters.

Mr. Gottfried said the aerodynamic and physical stresses would be difficult for the laser stations to withstand. Mr. Gottfried added that the whole system would require extremely sophisticated computers for control. "I doubt there could be any human intervention," he said. He and other scientists worry about an "automatic" initiation of war in space, leading to war on the ground.

Further, the skeptical scientists say there is an almost unlimited range of possible Soviet countermeasures. One would be to increase the number of submarines with nuclear missiles. deploy them closer to the United States and then fire them in low trajectories. This would greatly reduce the time available for intercen-

Mr. Wood of the Livermore Laboratory said the "problem of short time lines of three minutes or less have been considered in great detail for years, and by the Fletcher panel, and satisfactory answers given." One example, he indi-cated, was the possibility of "forward basing" ina country such as Britain, permitting the pop-up weapons to attack rising Soviet missiles sooner.

Mr. Teller said the objections of critics, some of whom are his longime foes in the policy arena, "do not show that all that we are doing is useless, but only that we are not completely successful as yet and that further improvements

Spain: The Spinster Lets Her Hair Down

By John Darnton New York Times Service

MADRID — A bent, elderly woman dressed entirely in black, from her stockings to her head scarf, was moving slowly down the street when she came upon a piece of paper on the sidewalk. It was a page from a popular magazine, a photo of a naked couple in amorous

The woman looked around slowly, stooped to pick it up and stared at it. Then she marched to a wastebasket, ripped the picture about eight times and dropped it in.

In this brief encounter, the two Spains met. One, old-fashioned, churchgoing, morally up-right. The other, modern, hedonistic and, so it seems, increasingly assertive.

Back in the Franco years, Spain was the

Victorian spinster of Europe. Now this has changed. Spain is not exactly a Babylon, but it has caught up with the rest of the Continent, and the changes in moral behavior and permissiveness seem doubly striking because they have occurred so fast.

"When I was my daughter's age, my father wouldn't let me go out of the house without a chaperon," said Teresa González, a Madrid hairdresser. "Even so, I had to be in by II o'clock. My daughter goes out to some place — The Joy Esclava — and I'm lucky if she comes back by dawn."

Suddenly Famous

The Joy Exclava is a discotheque, one of dozens with elaborate lighting displays and high-tech sound systems that have made Madrid's nightlife suddenly famous among young Europeans. After all, where else these days are the streets crowded at 2 A.M.?

"In Paris, the cops are all over you," said a young Englishwoman, her hair dyed blue and

In the old days, the power of the Roman Catholic Church and the state's anti-communist crusade drew the limits. Crime was low but widely defined. It was illegal for a boy and girl to be seen kissing in public. Spanish jails were filled with would-be drug smugglers trying to bring hashish from Morocco to the lucrative

Movies were so heavily censored for sex and politics that the plot sometimes ended up on the cutting-room floor. A famous example was the film "Mogambo." Wanting to avoid any sugges-tion of adultery between Clark Gable and Ava Gardner, the censor transformed them into brother and sister, thereby arousing Spanish

audiences with the spicy theme of incest. Now hard-core pornography plays in movie houses and soft-core sells at newsstands. Prostitutes are commonplace and visible and one member of parliament suggested setting up an official red light district to control the trade.

A Certain Decadence

Transvestites are featured attractions in the floor shows of expensive nightclubs, lending a certain prewar Berlin atmosphere of decadence to the place, and they also tend to congregate on a particular corner of the central Castellana Boulevard past midnight. If a car stops, one is liable to get in.

In contrast to the rigorous dress codes enforced decades ago, Spanish beaches are now topless and some are bottomless as well, which often shocks American bathers. Exceptions still exist in conservative areas such as Galicia in the

Some of the changes have been ushered in by the Socialist government of Prime Minister Filipe González, voted into office a year ago. Convinced that Spain's moral code was anachred. puffing on a marijuana joint at a recent ronistic in imposing heavy penalties for crimes concert of Police, the rock group. "London's too not recognized as crimes elsewhere, the govern-

expensive and you never see the sun. Rome, ment has passed legislation to liberalize the well, it's O.K. but a lot of crime. Spain's the penal code.

The liberalization began with an earlier regime, which legalized divorce. But the Socialists speeded up the process considerably. Among other things, the parliament has enacted bills to legalize sex changes, permit sterilization and, most significantly, to legalize abortion in therapeutic cases

Most striking of all was a bill approved last April that legalized the pessession of drugs, even hard drugs, including heroin, as long as they were held in small quantities and for personal consumption. In effect, Spain went in a single stroke from having one of the harshest drug laws in Europe to one of the most liberal.

Shift in Drug Traffic

Penalties remain for people trafficking in drugs - up to six months for soft drugs and from six years to 12 years for hard drugs. But some international drug experts believe these will not prove a sufficient deterrent to major dealers. They predict a shift in the pattern of European drug traific, with Spain replacing the Netherlands as a prime distribution center.

In addition, changes in the criminal justice laws aimed at reducing extremely long delays for people awaiting trial have led to the release of thousands of prisoners. This has combined with a widespread perception that crime is on the rise to make safety in the streets something of a potential issue for the rightist opposition.

The issue dovetails with that of morality, since the right views this as its special preserve and believes that the moral fiber of the country is disintegrating. The Socialists answer that they are not sponsoring a change in the moral stan- gambling. dards of the country but simply recognizing that one has already occurred.

"I myself am not in favor of abortion." said a cabinet minister, speaking privately, "But in the 20th century, people are going to go out and get hidden microphones, that is now aimed less at abortions, and it's absurd to send them to jail

In U.S., Legal Blow After Legal Blow Thins Out Top Ranks of Crime Families

By Leslie Maitland Werner

New York Times Service WASHINGTON — Justice Department of-ficials say they have won many significant battles in the last two or three years in the war against organized crime. In all major cities where traditional organized crime exists, they say, most of the top leaders are either in prison

"It's the greatest achievement we've had in organized crime," said Floyd I. Clarke, deputy assistant director of the Federal Bureau of Investigation's Criminal Investigative Division "In every city where there is a major organized crime family, we have indicted and/or convicted the top exhelons of that family, and that's all

within the past few years." But Mr. Clarke, as well as outside experts who share his assessment, caution that organized crime is still a serious problem and that it continues to operate while leaders are in jail. To suppress it, they say, the recent gains will have to be sustained for a long period. In New Orleans, Los Angeles and Cleveland

Mr. Clarke said, the entire leadership of crime families has been imprisoned for long terms. Sweeping cases have also been brought in New York, Boston, Cleveland, Chicago, Denver, Kansas City, Detroit, Philadelphia and Milwan kee, as well as in California, Florida and Louisi-

These successes have not been an overnight creation," said David Margolis, chief of the Justice Department's Organized Crime and Racketeering Section, "but have gradually de-veloped with innovations in law enforcement." The innovations and legislation introduced by each administration since President John F. Kennedy's are only now starting to show major effects. Mr. Margolis and other officials say.

'Incredibly Significant'

The assessment that the war against organized crime, while far from over, is showing heightened results comes from career Justice Department employees, not political appointees, and their view is supported by experts outside the government.

"The cases that have been made recently are incredibly significant - it's incredible," said G. Robert Blakey, a professor at the Notre Dame Law School who was in the Justice Department in the Kennedy administration and served as chief counsel for the Senate subcommittee that processed important organized crime legislation in the late 1960s.

"It's too early to predict the demise of the Mafia." he said. "but if this can be sustained for another decade, where the leadership structure is taken out and then their successors are taken. can decimate this particular aspect of organized crime. I think this could be the begins of the end for the Malia, I'm very encouraged.

Mr. Blakey, Mr. Clarke and other officials in the FBI and in the Justice Department's Organized Crime and Racketeering Section attribute improvement to several factors, most dating back a decade.

Under Clarence M. Kellev in the mid-1970s. they said, the FBI shifted its effort toward lity" cases with a new emphasis on organized crime, rather than on statistical volume. The bureau now devotes about a quarter of its work force to organized crime.

Further, there has been improved use of sophisticated laws enacted in the 1970s, such as the Racketeer-Influenced Corrupt Organization statute, called RICO, which permits a single prosecution for a series of crimes and can give the federal government jurisdiction for state offenses, including murder. In September, for instance, the Justice Department named seven men as leaders of a racketeering enterprise in Boston whose activities included murder and

He said he hoped it would crime family in New York, who was found collect information on the extent and operation guilty in San Francisco in 1980 of conspiring to of these new groups, about which the authorities thwart a grand jury investigation.

Also, around 1974 the FBI began using un-

dercover agents in long-term investigations. In Kaufman of the 2d U.S. Circuit Court of Ap-New York, for example, an FBI agent posing as a gangster infiltrated the Boanno family, re-ingures who attended an organized crime consulting in the conviction last year of three vention in Apalachin, New York, in 1957.

According to Oliver B. Revell, the ass High-level informers also were developed, director in charge of the bureau's Criminal In-

The assessment that the war against organized crime, while far from over, is showing heightened results comes from career Justice Department employees, not political appointees, and is supported by experts outside government.

partly as a result of the creation in 1970 of the vestigative Division, that meeting marked the Federal Witness Protection Program. For instance, Aladena James Fratianno, once a boss and executioner in the Los Angeles family, agreed to cooperate with the government, testi-

fying against former associates in Cleveland, Los Angeles and New York. Another factor cited as an improvement is the pooling of resources by once-competing law enforcement agencies in geographically based strike forces under specially trained prosecutors. For instance, state and federal agencies working together to investigate a dozen killings in a Cleveland gang war succeeded in winning the convictions last year of all the top leaders of the Cleveland Mafia, the officials say.

In addition, the FBI was given jurisdiction in narcotics cases for the first time and began to work jointly with the Drug Enforcement Ad-

According to Roger S. Young, assistant director of the bureau in charge of public affairs, the FBI has hired about 500 additional agents in the last two years, which has also helped in the effort against organized crime.

He explained that when priorities were reordered in the bureau a few years ago, it reduced its attention to cases involving individual automobile thefts and bank robbenes, and the local authorities "have picked up a significant por-

In New York, still the home of five of the strongest organized crime families, Police Commer Robert J. McGuire sees a "renewed sense of commitment" to fighting the problem. "Law enforcement is more willing to test the limits of what can be done now," he said. "There is more willingness to cooperate between agen-cies, to use RICO, to use wiretaps and undercover — all positive things that heretofore we were not seeing.

"I think we've made a lot of progress, but we were coming from way back in the race. The danger now is to make believe you've accombe sustained for a long period before you can

truly say they're on the run."

Mr. Clarke of the FBI agreed, while adding that recent statistics showed signs of substantial improvement. In 1981, he said, the bureau listed 515 organized crime convictions, and in 1982, there were 763. But for 1983, it estimates it will attain 1,300, a large number of them stemming

from narcotics cases. "But we are not in the position where we believe we have eradicated the problem," Mr. Clarke said. The bureau believes 24 traditional organized crime families are still operating in the United States, he said. The families are believed to be loosely grouped together in what the gangsters call La Cosa Nostra, literally our thing" or "our work" in Italian.

These do not include new, growing groups

such as motorcycle gangs, narcotics cartels and gangs of various ethnic backgrounds that are of mereasing concern to law enforcement officials, Mr. Clarke said.

The emergence of new types of organized

"Before that, we didn't even know it was called La Cosa Nostra," Mr. Revell said, adding that J. Edgar Hoover, then the bureau's director, believed that "localized criminal activity of a vice nature" was better left to the state and local

anthorities But in the 1960s, Mr. Reveil said, the bureau became aware that organized crime had a national scope and operated under a hierarchy with interrelationships and an internal government with a means to resolve disputes.

"We began to made periodic prosecutions, but mostly on the street or midlevel," Mr. Reveil

When Robert F. Kennedy was attorney gen eral from 1961 to 1964, he expanded the Organized Crime and Racketeering Section, formed in 1954, from 17 lawyers to 63. But the Congressional Quarterly Service reports that between 1960 and 1969, "of 5,000 known or suspected organized crime figures, only 257 were indict-

Legislative Changes Help

Mr. Margolis, who has headed the department section since 1979, said major legislative changes began in 1961, when Congress made interstate travel or telephone calls to promote racketeering a federal crime. In 1968 the Justice Department obtained the authority to seek court orders for wiretapping and bugging to investigate suspected criminal offenses.

As an example of the usefulness of such evidence, a Justice Department internal report says there were taps on the phones used when "Kansas City boss Nicholas Civella discussed the bribery of a federal prison warden and when "Joe Bonanno discussed obstructing a grand jury investigation."

Mr. Margolis said the Justice Department broadened its efforts after the Organized Crime plished more than you have. This effort has to Control Act of 1970 provided tools for an expanding group of Organized Crime Strike

Forces across the country.
There are now 14 of these task forces totaling 141 lawyers as special prosecutors, supervised by Mr. Margolis. The teams also include representatives of the FBI, the Drug Enforcement Agency, the Internal Revenue Service, the Secret Service, the Labor Department, the Postal Service, the Customs Service, the Bureau of Alcohol, Tobacco and Firearms, the Immigration and Naturalization Service and the local

The Organized Crime Control Act, which included the RICO provision, also gave the federal authorities the means to seize the assets of criminal enterprises.

To lessen fear of testifying against organized crime, the Federal Witness Protection Program was established. This program, in which the government relocates endangered witnesses and may even give them new identities, has encounaged testimony not just from innocent victims but from several organized crime leaders themcrime was one reason given by President Ronald selves, officials say:

'Pack of Lies' Explores The Morality of Spying

By Sheridan Morley International Herald Tribiose

TONDON — Though the posters will nowhere tell you this, Hugh Whitemore's "Pack of Lies" (at the Lyric) is based on an old television play of his about the people who lived across the road from the Krogers at Ruislip in 1960. The Krogers, you may recall, were the rity's home in his or her absence to ones who had a radio receiver in their basement and sent NATO submarine secrets to Moscow for

THE LONDON STAGE

the spy Gordon Lonsdale, but Whitemore's interest has always been in their neighbors and friends, the family whose lives were disrupted forever when MIS arrived and asked to put telescopes in their bed-

The play is about the morality of spying on your best friends across the road simply because they too happen to be spies, and it is wonderfully played by Judi Dench and Michael Williams as the neighbors, Barbara Leigh-Hunt and Larry Hoodekoff as the Krogers and, above all. Richard Vernon as the man from MIS who sets the whole neighborly betrayal up with a wea-

ry kind of elegance. Whitemore, while sticking very who gave us "Another Country" close to documentary truth, gives and "Half-Life," this one is oddly planatory out-front monologues, which hints at the need for a little padding to get a tele-play up to stage proportions. All the same, it ns one hell of a good story.

Charles Dyer writes like a dream; the trouble is that the dream he writes like doesn't often have a lot to do with the construction of actual drama. The anthor of Staircase" and "Rattle of a Simple Man" writes in his own kind of language, a language of rambling monologues for people in extreme loveliness but still managing to 'shrick for glory, solve little mysteries, compose a snatch of music and hear it on a distant crackle from Samarkand."

Dver writes about people who carry on when they aren't needed, and though I fear that his latest play, "Lovers Dancing," may not be long with us at the Albery it cannot be dismissed quite as rapidly or gleefully as some of my critical

colleagues would have you believe.
In the first place, both "Staircase" and "Rattle" have been among the most commercially successful and oft-revived of postwar plays, so we are not dealing here with some loony poet making an occasional excursion into the drama. Secondly, four actors of the caliber and tele-fame of Paul Eddington, Colin Blakely, Georgina Hale and Jane Carr (who make up the entire cast) are not about to commit themselves to an utterly unworkable play, and "Lovers Dancing" must, at least on paper have seemed to have a good dea

oing for it. In that we now have a quartet where in "Rattle" and "Staircase" we only had couples, "Lovers Dancing" does represent a kind of two-step forward. It too is about exual disaster and people trapped

side their own impossible expecons, but it also belongs to the ion tradition of drama. For 19 i, two dancing couples have By meeting on the anniversary of ful bed night when, following room championship in which BOouple (Blakely and Hale) won

By Andrew Clark

GENEVA — While the rest of Europe has been paying anniversary homage this year to Wag-ner and Brahms, French-speaking Switzerland has been remembering the conductor Ernest Ansermet. born 100 years ago in the town of Vevey on Lake Geneva.

A special exhibition and a series of commemorative performances have been organized in Switzerland, culminating in a concert of Brahms's "A German Requiem" in Geneva's Victoria Hall on the anniversary of his birth, Nov. 11, and a new production of Debussy's "Pelléas et Mélisande" at the Grand Theatre the following day. For those who know of Ansermet only through the recordings he made in the 20 years before his death in 1969, the effect has been to show the richness of his contribution not just to Swiss musical life, but to European culture in general.

Ansermet --- who started his career teaching mathematics at Lau-sanne University — achieved his first international platform in music with Diaghilev's Ballets Russes. Between 1915 and 1923, Ansermet conducted no less than 12 first performances, including Satie's "Parade," de Falla's "The Three-Cornered Hat' and a host of works by Stravinsky such as "Le Chant du Rossignol," "L'Histoire du Soldat" and "Les Noces."

European Airlines Rapped

CONDON—The quality of many European airlines has plunged to the depths with insipid, rubbishy food and passenger-hating cierks, a consumer's travel guide reported Monday.

The inspection team for the annual Egon Ronay's Lucas Guide to Hotels, Restaurants and Inns rated 18 European airlines on comfort, food and sension but the results were less than encouraging.

food and service, but the results were less than encouraging.

Food on most European airlines is "insipid, dull, unimaginative and often rubbishy," said the guide's inspectors, who took at least two flights

on each of the 18 airlines. "Beyond this ignorance or thoughtlessness there is a lot of sheer bad catering," they concluded, citing "insipid salmon, soapy cheddar and thick, sinister, stewed coffee on Aer Lingus (Ireland); greasy, cold pork on TAP (Portugal); finger-breaking rolls on Iberia (Spain); sloppy vegetables on Swissair; warm tomato juice and sickly pink syrup on

British Airways; a surfeit of gristle and fat in the meat on British Midland; stale, dry bread on Alitalia." The inspectors showed no respect for service rendered before the flight. "The miserably smileless and sometimes passenger-hating check-in clerks

are among the worst aspects of air travel in Europe," they said. Once in the air, the trip gets no better. The team said, "Comfort is

deteriorating, seating arrangements are getting miserably cramped and legroom is increasingly less."

The guide, which also rates European hotels and restaurants, said more hotel managers are "jumping on the up-market bandwagon to luxury," gearing express service to businessmen and women.

ATHENS — Jellyfish are in bloom all over the Mediterranean and the experts don't know how

to protect swimmers and fishermen from their painful,

sometimes deadly stings.
Scientists and engineers from the United States and

16 European nations, after a weeklong conference on the jellyfish menace sponsored by the United Nations

Environment Program, admitted they were baffled.

Five years ago, two species of jellyfish suddenly started to multiply around the warm Mediterranean

coastland waters where about 200 million tourists

spend vacations every year.

Jellyfish "blooms" are formed by thousands of densely packed jellyfish each able to bud off into more

than a hundred young jellies.
"We just haven"t been able to work out why it

adapt to their environment and use sewage as food."

T. Boone Pickens, Jr.

GULF INVESTORS GROUP

116 John Street, 26th Floor New York, New York 10038

AN IMPORTANT MESSAGE TO ALL SHAREHOLDERS OF

GULFOIL

The Board of Directors of Gulf Oil Corporation has suddenly called a special meeting of shareholders to be held December 2, 1983. They are proposing to reorganize Gulf as a holding company, moving the state of incorporation from Pennsylvania to Delaware.

While this may seem like a harmless legal technicality, in fact this move would eliminate important shareholder rights.

WHAT'S THE RUSH?

For sixty-one years, Gulf has been a Pennsylvania corporation. Now, suddenly, the Board proposes to establish a Delaware holding company in order to "have greater flexibility in such areas as financing and in formulating [Gult's] acquisition strategies." The Board of Gulf admits in its proxy material that it has no current plans to utilize this so-called "greater flexibility." Yet it has called a special shareholders meeting rather than waiting for the annual meeting, which is only a few months

UNDER THE BOARD'S PROPOSAL. **WE BELIEVE YOU LOSE**

You lose • Gulf shareholders will lose the ability to require Gulf to submit proposed charter amendments to a shareholder vote. Currently, holders of 10% of the shares can require the submission of such shareholder proposals to a vote.

You lose • Gulf shareholders will lose the ability to call a special shareholders meeting. Currently, the holders of 20% of the shares can call a special meeting.

YOU IOSE • Gulf shareholders will lose their right of cumulative voting in the election of Gulf directors. Cumulative voting affords a substantial shareholder the power to elect a board member who would then be able to communicate with Gulf management and other directors at the Board of Directors level. Such board representation would help assure a full review of strategies which might not otherwise be considered.

You lose • If you are a Canadian shareholder of Gulf, you will be forced to treat the reincorporation as a taxable event for Canadian tax purposes - just as if you had sold your shares.

REINCORPORATION: WHO BENEFITS?

In our opinion it is the responsibility of the management of a public company to increase shareholder values. Ask yourself whether the reincorporation proposal, with its elimination of shareholder rights. will further that objective. Ask yourself whether the elimination of cumulative voting (the elimination of which the Securities and Exchange Commission Division of Corporation Finance has identified as an "antitakeover measure") will be in your financial interest. The Reincorporation Proposal may be good for Gulf management, But is it good for you?

Members of the Gulf Investors Group have invested nearly \$800 million in Gulf stock and own 17.9 million Gulf shares, representing 10.8% of the total outstanding. Our substantial financial commitment creates a common bond with all Gulf shareholders who seek to enhance the value of their investments in Gulf.

We believe the reincorporation proposal is a defensive reaction to the emergence of an independent shareholder group. Gulf's defensive posture was summed up by one of Gulf's "Wall' Street strategists" as follows: "Let's just say for the moment that we're strapping on our six shooters." (October 20, 1983, The Wall Street Journal)*

If you agree with us that the purchase of a major investment in Gulf stock does not justify the hostile reaction of a hastily called special shareholder meeting that will eliminate important shareholder rights, then you must act swiftly to protect your investment.

Thank you.

On behalf of the Gulf Investors Group

T. Boone Pickens, Jr.

Sign, date and return the BLUE proxy card. Vote AGAINST the reincorporation proposal.

Even if you have already returned a previous management proxy, your later dated **BLUE** proxy will be the only one that counts.

If your shares are held at a bank or brokerage firm, and you are concerned that your vote may not reach the Gulf Investors Group in time, please call our proxy solicitor:

Goette Is to Succeed Lennings at GHH After Discord on Troubled MAN Unit Steel Pact

Manfred Lemmas resigned Tuesday from his position of management board chairman of Gutehoffmungalmette Aktienverein, or GHH, Enrope's largest machine-building group, capping a bitter boardroom dispute. He is expected to amounce his departure from a parallel post as supervisory board chairman at Maschinenfabrik Ausburg Nuemburg, or MAN GHIPP his chairman at Maschinenfabrik Ausburg Nuemburg, or MAN, GHH's biggest unit, Friday.

Mr. Lennings, 49, will be succeeded at GHH by Kines Goette, 51. Mr. Goette is a member of MAN's su-

pervisory board and an adviser of Allianz Versicherungs, the West German insurance concern that is a major shareholder in GHH. Mr. Lenning's departure from GHH came as no surprise. He had

been embroiled in a disagreement over how to turn around the group's troubled MAN unit, and group's trombed MAN unit, and threatened to step down from both positions—at MAN and GHH— if forced to step aside at MAN. MAN had a loss of 300 million Deutsche marks (\$113.6 million) last year, on sales of 8.8 billion

GHH said Tuesday that Mr. Lennings resigned over differences of opinion concerning personnel and organization. Mr. Lennings, reached at his home Tuesday night, had

The supervisory board chairman of GHH, Klass Haoiel and the deputy chairman, Georg Benz, also resigned from their posts; but will remain supervisory board members. They will be replaced by Matthias Secledez, former management board chairman of RASF, and Guenter Enting, a secretary of the engineering and steel workers union, IG Metall, respec-

Mellon Names Hurlbutt to Higher Post Mellon Bank is transferring the management responsibilities for its operations in Europe, the Middle East and Africa from its headquarters

operations in Europe, the Middle East and Africa from its neacquarters in Pittsburgh to London. "The move is designed to enhance the bank's ability to meet its customers' needs by bringing senior management closer to the markets Mellon serves," the bank said. "For many years," Ralph B. Huributt, a senior vice president, said, "we've managed (the Europe, Middle East and African region) from Pittsburgh, but we've reached the level of market penetration," where this arrangement has become "inefficient and not terribly effective." Mr. Hurlbutt has been named head of Mellon's Europe, African and Middle East operations, which he said last year accounted for about 10 to 15 percent of Mellon's worldwide profits.

In the future, Mellon will be "focusing our energy a little more systematically," Mr. Hurlbutt said. He added that the bank will make careful surveys of each market and make changes accordingly. Mellon has branches in London and Frankfurt and representative offices in Atlens and Milan. In addition, it has an investment management company in Zurich and a joint venture in London. Mr. Hurlbutt said the bank is looking into opening representative offices in Madrid and Paris. For the past two and a half years, Mr. Hurlbutt has been manager of the London branch. He has also held assignments with Mellon in Pittsburgh, New York, Tokyo and Manila.

John H. Male has been appointed general manager of the London branch, succeeding Mr. Hurlbutt.

Other Appointments

Patrick Sheeky, chairman of BAT Industries, which last week bid £796 million (\$1.18 billion) for Eagle Star, the insurance concern, is to join the board of British Petroleum, effective Feb 1. BP also said Lord Inchespe will be retiring from the board on Dec. 31, after more than 18 years as a director. Lord Incheape recently retired from the chairmanship of P&O,

the shipping concern.

Raymond J. Dinkin has been appointed vice president-Continental Europe for Scott Paper International. Mr. Dinkin, who is based in London, will have responsibility for Scott's operations in Belgium,

Scott's affiliate in Britain. Jacques Clégnac has left his position as head of Eurobond sales at Crédit Commercial de France to set up his own investment advisory company. Jean-Louis Bernardini has succeeded him at the Paris-based

Bankers Trust Co., the New York-based bank, has appointed Jan R. Brumm, senior vice president and head of the international department's Europe group, as senior commercial banking officer for Europe. Mr. Brumm has been transferred from New York to London. In addition, Brian R. Cook has been appointed general manager of Bankers Trust's London branch following the return of Asa B. Davis 3d to New York, where he heads the international department's staff group. Mr. Cook retains responsibility for the bank's European network management.

U.S. Ruling May Peril

By Smart Averbach Washington Past Service

WASHINGTON - The International Trade Commission has issued a preliminary ruling in an unfair-trade-practices case that could jeopardize the year-old steel exports to the United States. By a 4-0 vote, the ITC ruled Monday that there were "reasonable indications" that imports of carbon-steel plate from makers in Belgium and West Germany have harmed a small Portland, Oregon, steel maker.

The complaint filed by Gilmore Steel Corp., which was not one of the 15 U.S. steel companies that took part in the agreement setting import quotas on European ster accused the West German and Bel-gian companies of dumping steel in the U.S. Northwest at prices below

its production costs.

The European Community, which called the complaint "un-founded," has asked for consultations with U.S. trade officials over the future of the steel-quota agree-

ment in light of the complaint.

It is unlikely, however, that the community will move to cancel the preement immediately, although propean officials have said privately that the Reagan administra-tion should have refused to accept the Gilmore case in light of the steel-quota arrangement

"It is hard to imagine that injury has been caused by imports from the EEC," said Ella Krucoff, a community representative.

Moreover, an EC official said. the complaint will have an immediate economic impact on the Euroan steel industry as U.S. buyers hesitate to place future orders because of the possibility of the prices being increased by customs duties. Commerce Undersecretary Lio-

nel Olmer told an ITC hearing last month that his department accept-ed the case because it met all the requirements of the law.

Mr. Olmer told the ITC hearing that EC steel exports to the United States have dropped during the past year. In the first eight months of 1983, they were down 37.6 percent from levels of the like period last year and the EC's total share of the U.S. steel market decreased from 6.31 percent to 4.64 percent,

He said the agreement with the EC was reached after "complicated, painstaking negotiations" that included consultations with compames that accounted for 77 percompanies agreed to drop their complaints of unfair trade practices against EC steelmakers and promised not to file any new ones until the agreement expires in De-

The Gilmore complaint still has a long way to go before it becomes final, however. The Commerce Department's International Trade Administration has until January to decide whether the European companies are dumping their products and, if they are, to make a preliminary finding of the differ-ence between their price and a fair market value.

The ITC would then make its final decision on whether the company has been injured by the im-ports. That would be followed by a final Commerce Department ruling on the "dumping margin" — the difference between fair market value and the selling price.

William E. Brock, right, the U.S. trade representative, met Nov. 1 with Hisashi Shinto, president of Nippon Telephone & Telegraph Co., to discuss a new purchasing agreement.

Japan's NTT Buying More Abroad But U.S. Wants Door Open Wider

By Steve Lohr New York Times Service

TOKYO -Slowly and reluctantly, Japan's telephone monopoly is opening up to sales of foreign

William E. Brock, the U.S. trade representative, last February told Hisashi Shinto, president of Nippon Telephone & Telegraph Co., that a three-**Vear agreement meant to increase such sales had** been of "little value" since it went into effect in 1981, according to U.S. officials.

Mr. Brock reportedly warned that if the government-owned corporation fails to start purchasing more U.S. equipment he would recommend against renewal of the agreement when it expires at the end of this year.

Termination of the agreement would almost certainly close the lucrative U.S. telecommunications market to Japanese manufacturers.

Things, however, went much more smoothly on Nov. I when Mr. Brock again visited NTT head-quarters in Tokyo. He called the meeting "the most constructive session I've had with Mr. Shinto and definite" willingness to alter the current agreement in four areas of special concern to U.S. companies: leasing, specifications, proprietary data and joint

U.S. and Japanese negotiators are scheduled to meet this week in Washington for more detailed

One Reagan administration official remarked "After two years of bureaucratic inertia that held up implementation of the agreement, we are finally seeing some progress."

Last month N IT announced plans to buy sever-

al U.S. products, including a large system for handling communications traffic from American Telephone & Telegraph Co. and a computer from

Cray Research Inc.
The purchases are expected to increase NTT's procurement of U.S. goods to \$140 million in the fiscal year ending next March 31.

By comparison, Japanese companies sold prod-ucts worth from \$600 million to \$900 million in the United States last year. The total varies depending (Continued on Page 11, Col. 4)

Allianz May Lift Its Eagle Star Bid

But West German Insurer Says That It Needs More Data First

By Bob Hagerty

LONDON --- Allianz Versicherungs said Tuesday that it was seriously considering a higher takeover bid for Eagle Star Holdings of Britain but that it needed more infor-

The British tobacco and retailing giant BAT Industries offered £796 million (\$1.18 billion) last week for the British insurance company, or 575 pence a share. That bid, the biggest ever in Britain, topped an offer of 500 pence a share from Allianz, the West German insurer that owns 29.9 percent of Eagle.

The stock market continued to bet on a higher offer from Allianz. Eagle shares closed Tuesday on the London Stock Exchange at 609 pence, down 6 pence on the day. Dealers said some speculators sold because of the delaying move by Allianz, but the price remains well above the BAT bid, acceptance of which has been recommended by from Allianz

Allianz said it could not make up its mind until:

 It learned whether the bids would be referred for study to the Monopolies and Mergers Commis-

• BAT released its formal offer document and Eagle responded of-

• The Department of Trade and offers better growth prospects," he Industry signaled that an Allianz said.

takeover would be permissible un der insurance company law.

A spokesman for Morgan Grenfell, Allianz's merchant bank adviser, said all the information should be available within 10 days. Allianz may have a further statement as early as late next week, he said, but is more likely to wait until the following week

Allianz does not want to show its hand before it is necessary. A study by the monopolies commission, which analysts generally consider unlikely, would delay the bidding about six months. If such a study is to be made. Allianz will want to leave its options open.

In response to Allianz's statement, Eagle Star said that the West German company had "given no Eagle's board has embraced the BAT bid as a means of escaping an Allianz takeover but has said that it is open to considering a higher bid

Meanwhile, the market is looking for other likely takeover targets among British insurers. Peter Martin, an analyst at Capel-Cure Myers, said the two most likely candidates appeared to be Phoenix Assurance and Sun Alliance. Both companies' shares have risen about

20 percent since Allianz made its ficially to both bids.

• Eagle, complying with British takeover rules, supplied Allianz was the most likely choice. "It has an excellent book of U.K. business, and excellent book of U.K. business, and the property of the Eagle Star and the Eagle Star and the Property of the Eagle Star and the Eagle Star and the Property of the Eagle Star and the Eagle Star and the Property of the Eagle Star and the Property of the Eagle Star and the Eagle Star and

Large Deficits Will Slow Upturn, Feldstein Warns

By John M. Berry Washington Post Service

WASHINGTON - Large federal budget deficits will not abort the economic recovery next year but eventually will make the expan-sion "lopsided . . . slower paced, more fragile and more inflationary" than if the deficits were smaller, Martin S. Feldstein, chairman of the President's Council of Ecoic Advisers, said i desday.

"Although no one can be sure just how the economy will behave in the face of such unprecedented deficits," Mr. Feldstein told Congress's Joint Economic Committee. the longer the deficits are expected to persist, the greater are the risks to our economic future."

Mr. Feldstein has repeatedly urged Congress in recent weeks to act quickly on President Ronald Reagan's proposed spending cuts and standby tax increases for fiscal But the two committee members

resent, Senator Lloyd Bentsen. Democrat of Texas, and Representative Lee Hamilton, Democrat of Indiana, said that, politically, Congress cannot produce a deficit-reduction package without the leadership of the president. They were critical of Mr. Reagan's statement

that he would not accept any tax

The council chairman replied by stressing that a clarifying statement was issued by the White House the next day declaring Mr. Reagan's continued support for the standby tax proposal, with its requirement for spending cuts. "The president doesn't want a tax package. He wants a deficit-reduction package,"

has given the strong impression that he wants no part of any tax rise, unlike Mr. Feldstein. "Both of you are against deficits," the Indiana congressman said. "But it seems to me that the president's opposition is conditional, and that he opposes tax increases more than he opposes deficits. It seems to me that you would prefer increases in

taxes to an increase in the deficit." Mr. Feldstein, in tracing the impact of the large deficits — which he said would remain close to \$200 billion annually unless action is taken to reduce them - said much of the effect is felt through higher interest rates relative to inflation.

"It is standard textbook economics to note that the direct fiscal stimulus of the large 1984 deficit will do more to raise demand in 1984 than the increased real interest rates that result from 1984's last week apparently indicating deficit will do to depress demand,"

Martin S. Feldstein he said. "It is clearly wrong to say that next year's deficit will abort

the recovery in 1984." In the longer run, Mr. Feldstein continued, high real long-term inhas been felt by industries produc-ing goods and services for export." shares later. The total value of the

Investment Fund in U.S. **Acquires Olivetti Shares**

By Axel Krause International Revald Tribune

PARIS — Italy's Olivetti group has sold a minority share of its stock to an investment fund in the United States and is talking with other, mainly Italian, financial interests about selling additional shares, according to company and Italian banking sources Tuesday.

Olivetti has kept details surincluding the identity of the U.S. fund and the number of shares involved. A spokesman at the company's headquarters in Ivrea, Italy. aid Tuesday that the sale to the U.S. fund represented part of the shares the company repurchased from the Bull computer company and the Saint Gobain group, both

In announcing that transaction Nov. 2 in Paris, Carlo de Benedetti, terest rates caused by the high level Olivetti's chairman, said that he of federal borrowing "crowds out intended to immediately repuractivity in key interest-sensitive chase about half of the 23.3-percent sectors" of the private economy. So interest in his company held by far, much of this adverse impact Bull and Samt Gobain and that he

transaction was estimated at \$140

The Olivetti spokesman said that the U.S. fund had bought what he termed "a part of the half" that had been repurchased from the French companies and that the remaining shares were transferred to Compagnia Industriali Riunite (CIR).

The spokesman declined to say whether the company would exercise its option on the remaining rounding the transactions secret, half of the shares under French

CIR is a holding company controlled by Mr. de Benedetti. Until 15 percent of Olivetti, making it the second-largest shareholder after the French companies. Mr. de Benedetti indicated to re-

porters last Friday that CIR might sell the shares, probably to Italian interests, but he declined to go into detail.

A senior Italian banker familiar with the transactions said Tuesday that Italian financial interests were definitely interested in buying the shares, and he indicated that an agreement might be announced within two weeks.

W. Germany Agrees to Help Saarstahl After Workers Accept Payment Cuts

BONN (Reviers) — The West German government approved additional aid Tuesday for the financially troubled steel maker Saarstahl, Economics Minister Otto Lambsdorff announced.

Saarstahl, a subsidiary of the Laxembourg-based steel group Arbed, reportedly faced imminent collapse without new funds.

Mr. Lambsdorff told a news conference that 86 million Deutsche marks (532.1 million) in aid will be available in 1983 and a "lima" contribution of 100 million DM is to be made in 1984.

The government decision came after labor leaders had announced that Saarstahl workers had agreed to accept cuts in memployment compensa-tion, removing the last obstacle to the government rescue.

New Zealand Oil-Stock Boom Falters

WELLINGTON, New Zealand (Renters) - Prices of discompany stocks, which had risen sharply Monday in in New Zealand following a hydrocarbon discovery off the West Coast, slipped Tuesday when a southern exploration well was declared dry.

Prime Minister Robert Muldoon had warned Monday night against "excessive enthusiasm" following Friday's aminimement of a discovery at the Moki I well near Taranaki. He pointed out that only hydrocarbons and not oil had been found.

But an announcement by Placid Oil that it will abandon its Ratiura ! site discouraged investors in spite of the fact that Placid's license area is about 1,000 kilometers (620 miles) from the Taranaki fields and in a different geological sequence.

Grundig to Make VHS Video Recorders

FURTH, West Germany (Renters) — Grundig announced Tuesday that it will begin producing VHS-format videotape recorders in mid-1984, in addition to the V-2000 system it already makes. A Grundig spokesman was unable to say how many VHS recorders are to be produced but said they would be made entirely in West Germany under license from Matsushita Electrical Industrial Co.

Japanese Banks to Reduce Prime Rate

TOKYO (Reuters) - Japanese commercial banks said Tuesday that they will cut the short-term prime rate by half of a percentage point to 5.5 percent, effective Friday, in line with the recent reduction in the Japanese discount rate to 5 percent from 5.5 percent.

Their action follows the Japanese central bank's decision early Tresday to reduce interest rates on time deposits at private banks by a quarter of a percentage point, effective Jan. 4.

TIT Expects Higher 4th-Quarter Net

NEW YORK (Renters) — ITT Corp. said it expected fourth-quarter earnings to be higher than last year's \$1.84 a share. It would not be more

Earnings for the year are expected to be about 5 percent lower than last year's \$4.75 a share. The drop would be mostly because of extraordinary gains recorded for 1982. However, earnings from operations for the year should show considerable improvement, ITT said.

Manville Gets Extension of Deadline

NEW YORK (NYT) - U.S. Bankruptcy Judge Burton R. Lifland has given Manville Corp. two more weeks to try to agree with its creditors on Monday's extension was the 10th in the 14 months since Manville filed for protection from creditors under Chapter 11 of U.S. bankruptcy laws.

Citicorp Plans to Buy London Broker

LONDON (Reuters) - Citicorp of New York has announced plans to bury 29.9 percent of Vickers da Costa, the British brokerage firm, for

about £20 million (about \$30 million).

The 29.9 percent holding is the maximum that foreigners are allowed to

The 29.9 percent holding is the maximum that foreigners are allowed to buy in a British broker. But outside Britain, Chicorp is beying majority interests in Vickers da Costa's eversess offices, including those in Hong Kong, Singapore, Tokyo and New York.

The Citicorp plan, amounced Monday, would be the second participation in a London stockbrokerage by a U.S. banking company since the London Stock Exchange relaxed its rules limiting the ownership of member companies, a stock exchange spokesman said. Security Pacific Corp. of Los Angeles earlier bought 29.9 percent of the brokerage firm of Hoare Govett Ltd.

Where to Find Low-**Priced Stocks Before** They Become **High-Priced Stocks**

The Investors Alert newsletter published by First Commerce Securities can assist you in discovering the next "super" stocks.

First Commerce is a research-oriented investment banking firm specialising in analysing economic trends and in recommending emerging high-technology stocks.

Every issue of our weekly Investors Alert investment advisory service covers specific information on selected fast-growing companies that are expected to become big stock market winners.

Stock markets in financial centres worldwide are bustling with activity. Are you one of those investors participating in the multitude of money-making opportunities presently available?

At First Commerce we service both individuals and portfolio managers from virtually every country in the world. These clients are making better- than- average profits by acting on our well-researched stock recommendations.

The investors Alert weekly newsletters are available at no obligation on your part. Since this material is free, you have nothing to lose and a lot to gain by completing the coupon or calling our office in Amsterdam 31-20-260901. Telex 14507 firco nl.

Labor Unrest May Imperil Car Upturn

DETROIT - General Motors Corp.'s decision to boost its divi-dend in the fourth quarter is fur-ther evidence of a rebound in the U.S. auto industry. But one analyst has warned that discontent among domestic autoworkers threatens the recovery.

The unrest "certainly raises some problems," Harley Shaiken, labor and technology specialist at the Massachusetts Institute of Technology in Cambridge, said.

"The pendahun may be swinging back," away from concessions and cooperative attitudes of the past few years, he added GM announced Monday it would raise its dividend to \$1 from 60 cents a share because of the

mpany's large profits. GM's gains "have resulted not only from an improving economic environment but also from the efforts of GM's employees worldwide who have worked hard to enable GM to provide outstanding

products with good value for our U.S. Is Pushing NTT to Open Door Wider to Sales

(Continued from Page 9) on what items are classified as tele-

cations equipment. Although \$140 million is a small part of NIT's yearly procurement budget of about \$3 billion, it is more than three times the value of U.S. equipment bought in 1982 and nearly 10 times the 1981 figure.

Nonetheless, U.S. trade negotiators and industry executives complain, there are still several restrictions on access to Japan's munications market.

The Japanese, for example, have employed what their critics call unfair trade practices, such as using government-endorsed purchasin arrangements that favor a small group of Ispanese companies.

It is one thing the critics say, for Mr. Shinto, a former shipbuilding executive who took over the public corporation in 1981, to call for ming up the procurement process but it is another to get NTT's 320,000 employees to give up the tradition of buying exclusively from Japanese suppliers.

Foreigners recall Mr. Shinto's predecessor, Tokuji Akikusa, who once said, "The only thing we could consider buying overseas would be telephone poles and mops." Under Mr. Shinto's stewardship, however, NTT has taken steps to

lates its requests for bids into English, for instance, and it sends missions abroad to explain NTT's urchasing procedures. In Mr. Shinto's view, there are two major reasons why U.S. suppli-ers have won so few orders. For

panies cannot match the low prices offered by Japanese suppliers. For high-technology items, he said, U.S. producers often seem half-hearted in seeking NTT's business. U.S. companies want the tele-

communications agreement revised in these areas: • Leasing. The present agreement covers only purchases, not leasing. Thus, if a computer used in a communications system is leased. its procurement is not covered by

 Specifications. U.S. companies want NIT's product specifications to focus on the performance that is desired. Foreign executives com-plain that NTT's specifications often include irrelevant physical details, such as where ventilation boles should go. They suggest that NTT bases its specifications on what Japanese suppliers are already making.

• Proprietary data. This is not mentioned in the current agreement. One reason U.S. companies have been less than easer to deal with NTT is that they are reluctant to hand over product information to the government monopoly, which has close ties to Japan

 Joint research. The United States wants joint research prohelp foreign companies. It transjects, coordinated by NTT, opened up to foreign companies as well as Japanese enterprises. Much of Japan's research on semiconductors. computers and optical fibers has been done in NTT laboratories. NTT provides more than 60 per

cent of the financing for the tele-communications-satellite program bits" and that several other nations of Japan's National Space Devel- do not hesitate to buy them from opment Agency.

A senior Foreign Ministry official explained that Japan had dediscussions on renewal of the tele-

rather than buy them.

the United States.

cided to develop its own satellites, communications agreement infi-The U.S. officials respond by as- Douglas Newkirk, assistant U.S.

The satellite issue is making the nitely more difficult," said W serting that a communications sat- trade representative.

To Holders of 714% Convertible Subordinated Debentures due 1988/1993, par value \$1000, issued by Erinia N.V.

With reference to the undersigned Trustee's advertisements on 14 and 21 October 1983, announcement is hereby made that the Meeting held on 7 November 1983 lacked a quorum.

A Second Meeting, the legal validity of whose Resolutions will not depend on the number of Debentures represented, will therefore be held in one of the function rooms of Grand Hotel Krasnapolsky, 9 Dam, Amsterdam, at 10.00 a.m. on Wednesday,

Debenture Holders who wish to attend this Second Meeting should lodge their Debentures at the offices of European Banking Company Ltd, 150 Leadenhali Street, London, or Amsterdam Rotterdam Bank N.V., 595 Herengracht, Amsterdam no later than 14 November 1983 in exchange for certificates of lodgement, production of which will provide admission to the Meeting.

Manila's Financial Woes Blamed on Capital Flight

sar E.A. Virata blamed the Philip- credits were urgently needed to alpines' financial crisis Tuesday on a low resumption of imports of vital major flight of capital in the third food and raw material, now almost quarter and on severe credit restric- at a standstill. tions by international banks.

The country had an \$800-million capital outflow from July through September, Mr. Virata said at a conference of businessmen. The government of President Ferdinand E. Marcos has estimated that \$200 million of this figure was due to capital flight, and banking

sources say it could be higher. Mr. Virata said the flight of capital, triggered by the assassination Aug. 21 of Mr. Marcos' main political opponent. Benigno Aquino. compounded the country's debt problem and "resulted in an unmanageable liquidity position" for

its central bank. The prime minister said foreign banks terminated lines of credit worth \$700 million to the central

bank earlier this year. Virata secured a 90-day moratorium on debt repayments to banks. He said Tuesday that the government expected to conclude negotiations with the International Monetary Fund on Wednesday for 1984 stand by credits worth \$636 million.

MANILA - Prime Minister Ce pines' main trading partners that

Japan, Peru Agree On Rescheduling

TOKYO - Japan and Peru have agreed to reschedule the bulk of an estimated \$300 million of Japanese loans supplied for Peruvian crudeoil development since 1981, Japan

Peru Oil Ćo. said Tuesday. The two governments will exchange letters later this month on rescheduling official loans, and this will be followed by the signing of an agreement on rescheduling commercial loans, the company said.

The resheduling concerns Last month in New York, Mr. around 80 percent of 59.30 billion yen (\$250.3 million) in suppliers' credits given by the Japanese Export-Import Bank jointly with commercial banks, and the bulk of 15 billion yen in official loans sup-plied by the Japan National Oil Corp., the company said.

VALUED PROPERTY

OPPORTUNITY IN ENERGY AND RELATED INDUSTRIES

LEADING PROCESS EQUIPMENT COMPANY FOR SALE AS GOING CONCERN

Adamson & Hatchett - one of the world's leading heavy engineering companies, designing and fabricating a wide range of equipment for the oil, gas and petro-chemical industries - is for sale as a going concern.

The 41-acre site near Manchester (in North West England's industrial area, convenient for city centre and international airport) has 341,000 sq ft of factory space, with highly skilled workforce, excellent access, cranage, office and canteen

This is an excellent opportunity to acquire a leader in its field, available as a result of a group's rationalisation programme. Write in confidence to:

The Chief Executive, Acrow plc 8 South Wharf Road, London, W2 1PB.

Telex: 21868.

Speak French (or German, Spanish, Arabic and others) LIKE A diplomat!

What sort of people need to learn a foreign language as quickly and effectively as possible? Foreign service personnel, that's who. You can learn the same way with the course designed by the Foreign Service Institute [FSI] for use by U.S. State Department personnel stationed abroad. THE FSI for use by U.S. State Department personnel stationed abroad. THE FSI BASIC THENCH COURSE.

The basic french Course consists of a sat of audio cassettes and accompanying text books: you simply follow the writzen and recorded instructions. With the FSI's unique learning method you set your own pace — testing yourself, correcting errors, and reinforcing accurate responses. It is, we believe, the best course available to teach you a comprehensive knowledge of French.

The FSI's introductory Basic French

Inowledge of French.

The FSI's introductory Basic French comes in two parts. Part A provides an introduction to the simpler forms of the language and a basic vocabulary. Part B introduces more controller structures and additional vocabulary.

You may order one or both courses

Unconditional Gostrantae —

Try the course for three weeks. If you are not contrilled it's the fastest, essiest, most paintess way to learn Franch, return it and we will retund every parity you paid.

CONTROLLING (85%) INTEREST Fully licensed Bank (CI). Control-

ling 85% interest available via principal shareholder with re-maining shares also possibly available. Capital £1,000,000, deposit £10,000,000 expanding also owns subsidiary U.K. finance company turnover at present £4,000,000 per annum increasing with £200,000 net profits af-

Vendor trustees and regulatory powers would need to be com-pletely satisfied that depositors interests would be completely safeauarded.

Purchase price £1,700,000 could be satisfied by cash or "placed" shares etc.

Information only provided on clear evidence of prospective pur-chasers financial ability to pur-chase reply in first instance to bank's solicitors.

Box No. 034421, IHT, 63 Long Acre, London WC2.

Distributor-

Improve your export performance. On export markets one of the most vital

elements is the achievement

of the right distribution

and sales performance. Finding the right partner in these markets is not a matter of luck but of systematic search and good

It is one of the specialized services of Markon to select the company that fits in your international strategy.

If your company is interested in finding the right distributor in foreign markets do contact us and we will show you how we work. Contact Mrs. Yvonne de Gier.

Danes Are to Be Allowed

To Buy Foreign Shares

Reuters

COPENHAGEN — Danes will be allowed to buy shares abroad from the beginning of next year as part of the government's plans to ease financial restrictions, the industry minister, Ib Stetter said Tuesday.

Details of the move, which has been welcomed by the central bank, will be available in the next few weeks, Mr. Stetter told the financial daily, Boersen.

Brazil Optimistic On Trade Surplus United Press International

RIO DE JANEIRO - Brazil has announced a \$547-million trade surplus for October and says it virtually assuring that the 36-billion target for 1983 promised in a letter of intent to the International Monetary

Fund will be met. Brazil sold \$1.821 billion abroad during October in manufactured goods and raw materials, led by iron ore and coffee, said Carlos Viacava, director of the Import-Export Agency. Monday. For the first 10 months, the

surplus was \$5.463 billion, he said. Brazil promised the IMF a \$6-billion surplus for the year as part of the country's strategy for rescheduling its \$90 billion

in foreign debt.
Mr. Viacava attributed the figures to commodity price rises and currency devaluations.

IBH Subsidiary Terex Files in U.S. For Protection From Its Creditors

By Steven Greenhouse

New York Times Serner NEW YORK - Terex Corp. the fifth-largest U.S. constructionequipment maker, has filed for protection from its creditors, following

the lead of its parent company. IBH Holding of West Germany. Terex, of Hudson, Ohio, said it would continue normal business operations while plans were made for its reorganization. The company said it had filed papers Friday afternoon seeking protection from its creditors under Chapter 11 of

the U.S. Bankruptcy Code. Terex officials refused to comment further, but Wall Street analysis were guarded about the company's future.
"They need credit for their deal-

ers and to linance customer pur-chases," said David G. Sutliff, an analysi with Salomon Brothers. "If they can't get credit, they'll have real problems. Customers may not want to buy from someone who might go out of business."

IBH. which bought Terex from General Motors Corp. in early 1981, filed for protection from its creditors Friday morning under West German bankruptcy laws. The move followed a multibank rescue of IBH's major source of financing, the private bank Schröder. Münchmeyer, Hengst & Co., amid reports of loan irregularities involving IBH, in which the bank holds a 7.5-percent stake.

Since then, GM has apparently extended many millions of dollars to

IBH and Terex. The head of IBH, Horst-Dieter Esch, says GM agreed to forgive \$100 million of debt to IBH in 1982 and \$120 million in 1983 if the SMH bank and a Saudi shareholder would supply the company with \$100 million of fresh capital.

GM officials refused to say Monday how much they were owed by IBH. In Terex's court papers. GM was the largest unsecured creditor, with \$12.3 million in debt, and General Motors Corp. of Canada was the second-largest, with

\$3.5 million. In the papers, Terex said its assets totaled \$197.6 million and its liabilities \$176 million.

Like its parent, Terex has been plagued by the worldwide down-turn in sales of construction equipment, IBH had a \$45.4-million loss last year on sales of more than \$900 million, company officials say, and Wall Street analysts estimate that Terex had a loss of one-third to one-half that amount.

Analysis estimated that Terex B IBH Unit Seeks Accord sold \$300 million to \$400 million in bulldozers, large dump trucks and other equipment last year, down from \$600 million to \$700 million two years ago.

In selling Terex to IBH, GM acquired 19.6 percent of IBH's stock persons at Hudson and Brocklyn.

Because more than half of Terex's sales are abroad -- with Latin American countries major customers -it is also being burt by Third-World debt problems,

The 20-bank consortium that rescued SMH last week may be widened to provide more day to day liquidity, banking sources said Tuesday, according to Reuters in

The Banking Supervisory Office in Berlin has called a meeting Wednesday at which banks that had relatively small money-market lines or deposits outstanding to SMH will be asked not to reduce

their exposure. The meeting, probably to be held will bring together banks that had outstanding of 5 million to 10 million Deutsche marks (\$1.9 million to \$3.8 million) Nov. 1, the cut-off point that has been used in negotiations on the rescue.

Hanomag, a subsidiary of IBH, will have to stop production after Friday unless agreement is reached with suppliers on continuing deliveries of raw materials such as steel. James Lewis, a Terex spokes-man, said in a telephone interview day in Hannover, Reuters reported.

Democrats Propose \$8.5-Billion Bank to Aid Older Industries The plan also would create a Council on Industrial Competitiveness, composed of leaders from business, labor, government and the public, to study U.S. industrial modernization programs. DISTURBANCES IN THE FIELD

By Lynne Sharon Schwartz. 37T pp. \$15.95. Harper & Row, 10 East 53d St., New York, N.Y. 10022.

Reviewed by Anatole Broyard.

I takes a long time to get to the good part in Lynne Sharon Schwartz's third novel, "Disturbances in the Field." One has to slog through a lot of adolescent talk, which led me to wonder whether anyone but the parents or peers of adolescents could find them consistently interesting. They try so very hard: even their ideas seem to be choked with hormonal changes, to have poor complexions.

The first three-quarters of "Disturbances in the Field" reminded me of "The Men's Club" by Leonard Michaels. Lydia, Schwartz's heroine, meets with Nina, Gaby and Esther in what they call a philosophy study group, just as Michaels's men come together in a club to talk seriously if possible. But while his men struggle with ineffable wants and the paffling nature of human happmess, Schwartz's women, even as they grow older, sound as if they are writing term papers.

In every college, there's a certain kind of student who insists on writing "lyrical" or "personal" term papers, trying to mix memory and desire with the curriculum. When this happens, the instructor is almost always embarrassed or frustrated, and this is how I felt much of the time while listening to Lydia, Nina, Gaby and Esther. All through the book I came across sentences beginning "Heraclitus was right," "The Greek atomist Leucippus beheved," "I thought again of Empedocles" or "Grief, Aristotle wrote . . .

There's a fortune-cookie quality to many of these quotations, a streamons and uninspir reaching for analogy or metaphor. Even when the parallel works, it seemed to me like the undigested lessons of an intellectual nouveau riche. It's hard enough to keep the rather ordinary lives of these four women clear in one's mind without the intervention of Schopenhaeur, Abelard and Heisenberg. In a true novel of ideas, all of these doctrines would have been implicit, for no character comes alive through a reading list. The very title of the book is a labored physics metaphor for human vicissitudes, which does nothing to explain or elevate them. It brings back memories of Kurt Lewin's unwieldy topological psychology.

Twice we hear about the unexamined life's

not being worth living, and I was reminded of Joseph Epstein's remark, in his recent book, 'Middle of My Tether," that he's not so sure about the examined life either. What we need in novels is lived life, examined or unexamined. Schwartz would do well to leave some of the philosophical correlations to the reader. Readers go to school, too.

But there are two sides to Schwartz's book. two voices. Though Lydia ironically refers to the movement from "the cosmic to the personal" as a falling off, she is, like Antaeus, strongest when her feet are on the ground. When the two youngest children of Lydia and Victor are killed in a bus crash while on a skiing trip, she becomes a woman, wife and mother and puts off, at least part of the time, her perennial student persona.

At the end of "Disturbances in the Field," Lydia's voice comes from the center of herself

It goes beyond literature and philosophy to a tough, battered truth. Perhaps it is only when the truth of a situation is simple that the people involved in it are permitted to have complex responses. It's as if their feelings dance around

the brote dilemma instead of expatiating on it. Lydia is good in her grief. Though I wish she wouldn't talk about guilt, that may be inevitable. More to the point, she suddenly questions. everything. What good is a hisband, she asks, mpared with a son and a daughter? Suddenly, adult relations seem so trivial next to mater. nal or paternal ones. She sees Victor as an abstraction, an abstraction with an irrelevant sexuality. Mourning, which may be the most philosophical of all actions, reduces everything

else to an invidious comparison. But Lydia plays the piano in a chambermusic group, and the other members insist that she perform. She has to project, respond, share, ebrate. Schwartz is wonderful in describin this and in showing how art infects life. The last part of "Disturbances in the Field" is so, well written that it balances all the rest. Unfortonately, what that leaves us with is a dead

Brazilian National Team the Latest of Soccer's Fallen Mighty

International Heroid Tribune

the pope of president. So could it be that win a World Cup," he continued, "we must rest were tied up with club duties, and low universal, has been the fall of the mighty this common man's feelings that the national the team."

Besides, Brazil's new tactics are hardly when Italian teams began entiring even the an overnight success. The South American next wave of young Brazilians (left back championship had brought a grinding oneyear. In Europe, the total eclipse of world champion Italy has been followed by elimination at the first burdle for S.V. Hamburg. the European club champion forced by austerity measures and injuries to field

And down Latin America way, the Brazilian samba, so joyously buoyant a year ago, grows humiliatingly faint. It is not just that Brazil cannot win the South American Cup -it hasn't since 1949 - but in losing this time it hid behind a boring spoiling, negative style that betrayed the instincts of players and people able.

Shortly before Brazil conceded the final to a weakened Uruguzyan side in Rio, a gatekeeper at Maracana Stadium performed the last rites on the present crop of players chosen to represent a land of 200 million soccer lovers. Some of the team had

you," and at that, the team members were

The story spread like brushfire through the land. It is not, I am assured, apochraphal; yet those Bra

team's recent style is foreign to him?

ROB HUGHES

crowd of 90,000 whistled loud and long. The derision fell principally, and for once rightly, on the coach. Regular readers of this column will know that I bear no ill-

dream among international managers.

To Brazilians, he is an endearing but the majority of matches the team played in know how. They are all, in their shanties Europe last summer, under Parreira's hand and on the beaches, forwards, all ballinition socces lovers, some or ine-team had burned up to watch Flammenuse play a for the first time, sensed the deep disapleague match—and were refused entry.

"Don't you recognize the players of the national team?" stormed the Brazilian exhibition at team?" stormed the Brazilian exhibition at team? stormed the Brazilian exhibition at the control of Rio, that the essatic homecoming of Rio, that the essatic homecoming of word at the the large material and on the beaches, forwards, all ball-players. They are bred on the emotional players. They are bred on the emotional players. They are bred on the emotional way of playing which, when Pele was beginning in 1958, inspired a 14-year-old named Parreira. It was then, in the streets of Rio, that the essatic homecoming of word at the the players method for the attack and the ball-players. more one ached for the attack-and-be-dammed philosophy the Brazilians briefly could not play so well, but never mind; he resourced at the 1982 World Cup.
"We did not win the World Cup," em-

phasized Parceira. No, but you won the the wrong time. The best Brazilians — become another Beckenbauer. But Brazilians connection. Portugal's hopes were reborn hearts and souls of millions who like to see Zico, Falcao, Cerezo — were abroad at the ians do not want their heroes built into the after last summer's resignation of its disilto Uruguay included Socrates, Junior and hearts and souls of millions who like to see Zico, Falcao, Cerezo — were abroad at the ians do not want Eder — faces better known than those of the game played as a creative sport. "To start of the summer tour. The best of the beart of defense.

down after the first leg in Uruguay, groped zilian style, Parreira admits he seeks to lished in Italy) the excuses flooded from toss — and finally humiliation against a reverse the attitudes, the organization, the Parreira: beliefs of his own people.

through a spiteful, defensive I-1 draw. The game is not worth playing as a mere athletic contest; that without enjoyment and superior techniques, there is no soccer. Parreira, the country's second national coach in live years to be steeped in physical will toward Carlos Alberto Parreira, in training rather than soccer knowledge, lurned the Italian league form book by deed his command of language and his began what amounts to a one-year trial unfailing courtesy makes him a journalist's period with a win-at-all-costs approach.

If it meant asking a defender to crudely chop an opponent advancing on goal, then totally misguided coach. Anyone who saw do it. The trouble is that Brazilians do not would train.

In essence critical both in word and deed Pedrinho and forward Luvanor to Catania. If so, he was narrowly ahead of the of Tele Santana, the departed manager multimide. Days later Brazil, already 0-2 who attempted to restore traditional Bra-

eliefs of his own people.

"We can say goodbye to the 1986 World
Even in defeat, Santana had said that the

Cup already," he said.

The lire-chasing Brazilians abroad are striking a rich vein even while Parreira's Zico's turn: Scoring his eighth goal since his controversial move to Udinese, he overbeating Roma — and compatriots Falcao and Cerezo.

Brazil would have given anything to have had the three of them in action, although how they would respond to orders to chase back and harass opponents is open to question. Left winger Eder, a wayward individual at best, is blunted by such duconsistent praise instead of criticism) because the Russians had led the

Carlos Nepomuceno Mozer, just 22, has home support, must win to qualify. His chance at the top came completely at the long stride and confident ability to

Sims Leads Lions To 15-9 Victory Over NFL Giants The Associated Press

PONTIAC. Michigan - Billy Sims rushed for 86 yards and the game's only touchdown and the Detroit defense forced four turnovers and a safety as the Lions posted a 15-9 National Football League victory over the New York Giants here Monday night.

Tying Terry Barr's club record of

38 touchdowns, Sims scored on a 2yard run at 13:44 of the first quarter to give the Lions a 7-3 lead.

On a second-and-eight at the New York 10 with 7:15 left in the second quarter, Giant running back Butch Woolfolk fumbled the ball into the end zone when his arm was hit by tackle Doug English. New York center Rich Umphrey fell on the ball but was covered by Mike Fanning for a safety and a 12-3 Detroit lead.

New York got field goals of 27, 56 and 35 yards from Ali Haji-Sheikh. The Lions' Eddie Murray kicked field goals of 35 and 32 The Detroit defense recovered

one fumble, intercepted three passes and came up with two sacks. Winning quarterback Eric Hipple completed 15 of 24 passes for 152 yards with two interceptions.

OBSERVER

The Thin Man's Diet

By Russell Baker

N EW YORK — At dinner this woman is telling me about her weight. She is up to 105 pounds and wonders whether she dare est dessert. I think she should eat five or six desserts because she looks as if a quick whisk of my napkin could blow her off her chair, but naturally I keep quiet.

Skinny women don't enjoy being told they're skinny nowadays. They enjoy telling you how they got that way, as though starvation were an achievement. They want to be praised for their willpower.

All you can do with this woman as hers can only be made a dollop more luscious with a piece of chocolate cake. This is diet conversation, one of the curses of modern social life. It makes me yearn for and buttered asparagus, and an ice-the good old days, which I've always thought were mostly bunk.

Still, there was a good old day being praised for being as flat as ironing boards. I have seen photographs of that day. They show ty-coons wearing their girth as badges of success. They show women of such fullness that you know for sure that under the corsets there is not a bony protrusion anywhere. Did these people sit around ex-

changing talk about how they became so plump? Did they brace you at the dinner table with questions like, "Do you think I'll lose a pound on the hips if I don't eat the

Surely not. People who are eating well don't usually spend a lot of time talking, except to call for second belpings.

I suppose the medical wisdom that conditioned people not to eat so enthusiastically has been good for the United States' health, but it's been terrible for social conversation. People who don't have to go hungry but have chosen to do so w like to talk about their predicament, as people who have undergone surgery like to talk about their operations.

I understand that. It must be hard never eating as much as you'd like when the table is groaning with food, and I suppose being praised for their abstinence helps them to endure, so I try to play the game

I realize that my lack of true

ANNOUNCEMENTS

sympathy may be because I was born with skinny genes and have always wanted to be 20 pounds heavier. This annoys people who are always hungry from dieting, and sometimes they can become spiteful about it.

Once, for example, I was invited to lunch with an extremely vital business executive about some trivial affair. I could have told he was very big in corporate affairs without checking Who's Who, because he was all bone with nothing but skin stretched over it.

He ordered first: a glass of soda is assure her that a figure as svelte water with a slice of lime, a piece of flat white fish with no sauce and a salad without dressing. I ordered followed by the steak with potatoes

I could tell from the way he looked at the waiter that I would when Americans didn't insist on never become a corporate vice president if he had anything to do about it. "What do you do for exer-

His gratification on hearing that I did neither gleamed through the sparkle in his eyes. I knew what he was thinking: "So, glutton, go ahead and stuff yourself, and I shall live to see you dead of aerobic insufficiency.

This prospect raised his spirits, making it easier for him to watch me enjoying a good meal. This didn't depress me as much as he wanted it to because I am aware that Methuselah lived 900 years without ever once jogging around Central Park. Still it made me yearn for the good old days when two men of the world could get together without engaging in a boasting competition about their bodies' capacity for storing oxygen.

I am reasonably sure there was once such a good old day. I am almost certain, for example, that Abraham Lincoln never jogged. While it would have enlarged his oxygen-storage capacity, it would probably also have made him a famous bore. Imagine having to lunch with a Lincoln babbling on and on about how Grant would be a much better general if he gave up whiskey and started jogging five miles every day before battle.

New York Times Service

Robert Waterman's Search for Success

By Samuel Abt

PNo. 1: In some remote time about a decade ago, before there really was a Japan, the business of the United States was business. and business was good. Economic principle No. 2: Now it isn't and maybe never will be again. But running a business successfully seems to be so simple, as

Robert H. Waterman Jr. explains it. "You've got three elements: people, making things, selling things. Somewhere, in a distant fourth place, is keeping track of things." The problem he contended over breakfast here, is that these priorities have often be-

"A lot of businesses have been treating humans as if they were machines, a business as if it were an abstract, a series of engineering components you could break down." For an instant Waterman looks surprised, as familiar as this finding is a year after the publication of his best-seiling book, "In Search of Excellence — Lessons From America's Best-Run Com-

"The common explanation of success used to be 'If you're big, you're best,' " Waterman says. The lessons of Eastern Airlines and International Harvester argue otherwise now, as does "In Search of Excellence." The book preaches that in bigness, small is heautiful.

Writing with Thomas J. Peters. Waterman states that "American companies are being stymied not only by their staffs . . . but also by their structures and systems, both of which inhibit action." A softspoken, 46-year-old business consultant, Waterman has an antidote, which he describes as a "general upbeat message" — There is good news from America. Good management practice today is not resident only in Ja-

He and Peters examine 14 big businesses — annual sales above \$1 billion - and find "8 basics of management excellence [that] don't just 'work because they work. They work because they make exceptional sense." Rendered sometimes in B-school shorthand, these basics

· A bias for action, for getting innovation and timing.

Author Waterman: "We're on a roll."

on with it — "Even though these companies may be analytical in approach to decision making, they are not paralyzed by that fact (as many others seem to

Close to the customer -"These companies learn from the people they serve. They provide unparalleled quality, service and eliability — things that work and

 Autonomy and entrepreneurship — "The innovative companies foster many leaders and many innovators throughout the organization. They are a hive of what we've come to call cham-

· Productivity through people - "The excellent companies treat the rank and file as the root source of quality and productivity gain. They do not foster we/they labor attitudes or regard capital investment as the fundamental source of efficiency im-• Hands-on, value driven -

Thomas Watson Jr. [of IBM] said that 'the basic philosophy of an organization has far more to do with its achievements than do technological or economic re-sources, organizational structure,

"Robert W. Johnson, former Johnson & Johnson chairman, put it this way: Never acquire a business you don't know how to

• Simple form, lean staff — "The underlying structural forms and systems in the excellent companies are elegantly simple. Top-level staffs are lean."

• Simultaneous loose-tight properties - "The excellent companies are both centralized and decentralized. For the most part . . . they have pushed au-tonomy down to the shop floor or product development team. On the other hand, they are fanatic centralists around the few core values they hold dear."

His and Peters's lessons have sold more than a million copies in the United States. It is still selling so well in hardcover that its publisher, Harper & Row, paid \$500,000 to a paperback publisher to delay publication from this month until March.

More than 400,000 copies have also been sold in the Japanese edition, Waterman says. A few weeks after publication, the French and German editions ingus."

8,000 copies.

He is in Paris visiting the office of McKinsey & Co., the business consultancy of which he is a director, or senior partner. The book grew out of a study McKinsey began in 1977.

Waterman himself appears to have responded adroidly to the change from consultant to successful author. "Peters and I each get four or five requests a day to speak somewhere. I probably avcrase between four and ten appearances a week, many of them all-day seminars. If they're in northern California, I do it just to keep me at home." He lives in Hillsborough, between San Francisco and Palo Alto, the hub of Silicon Valley and its high-tech industries, including high-tech self-help books.

Good-natured, humane and largony, "In Search of Excellence" does have a California feel, Waterman admits. "If it had been written anywhere else, it would have sounded different." A native of Denver, he has a 1958 degree in geophysical engineering from the Colorado School of Mines and a 1961 master's in business administration from the Stanford Business School, where he is an occasional suest lecturer. Peters, who holds a master's and a doctorate from the Stanford Business School, teaches there.

Their future projects include a financial analysis of excellence. "We're doing a study of a random stock portfolio versus these companies. Vis-à-vis their industries they're all superior financially. But on return to their investors we don't know yet. Timing is all. When the market started to turn around about a year and a half ago, I bought these companies and I've done very well."

They have at least two more books coming. One, Waterman says, is a collection of articles written before "In Search of Excellence." The other is a bigger project, what he describes as "a snapshot in time, how these companies got to be excellent. Also, some companies have taken our ideas and we'd like to look at them and see how they're doing. "We're on a roll We'li stay

PEOPLE Ranch 'Aide' Resigns

day accepted "with great regret" the resignation of Dennis LeBlanc, the \$58,000-a-year Commerce De-partment official whose duties included doing chores at Reagan's California ranch. LeBlanc said he is leaving his job as associate adcommunications Administration to served as chauffeur when Reagan ington and worked in the White House when Reagan was elected during those trips, although Com-merce officials said the bill for his salary was sent to the White House. Despite his high position in formu-lating national telecommunications policy, LeBlanc helped Reagan chop wood, clear underbrush and do other chores at the president's Santa Barbara ranch.

Coretta Scott King, widow of the U.S. civil rights leader Martin Lu-ther King, is in Zimbabwe this week to help organize a conference of African women. She arrived Mon-day night with 15 other American women who will be advising Zimbaweans on preparing for the 1985 conference. It is Mrs. King's first visit to Zimbabwe, which was ruled by its white minority until establishment of a black majority government in 1980.

The violin virtuoso Jascha Heifetz says "I didn't resign, I quit," in a dispute over his master classes at the University of Southern Califorreport in the student newspaper that he had resigned because of his age. "Nonsense — I quit," said Heifetz on Monday at his hilltop home in Beverly Hills, where he has

President Ronald Reagan Mon-Heifetz has not performed in public for 10 years.

On his 65th birthday Monday, Billy Graham stood at the site of his first major crusade in Los Angeles ministrator of the National Tele- and preached part of the sermon he_ first delivered in 1949, but added a take a position with Pacific Tele- warning that nuclear war might be phone & Telegraph Co. A former God's instrument of judgment. In California state trooper who had an update to the "hellfire and brimstone" message he preached at the was governor, he moved to Wash- tent meetings that launched his ministry as an evangelist, Graham said the United States must repent president. Soon after, LeBlanc of its sins or nuclear war might be joined the Commerce Department God's punishment. As I did 34 and headed a staff of 12 to develop a national telecommunications policy—though he acknowledged at least two staff meetings. "I have several hundred onlookers at a cerno communications background." emony unveiling a city-county While in government service, LeB- plaque commemorating his first big emony unveiling a city-county lanc communed to make trips to crusade. The nations of the world California with Reagan. He was stand at the very brink of Armapaid by the Commerce Department geddon." Roy Rogers and Dale Ex-during those trips, although Compy Birthday."

The self-styled King Richard of

Hay-on Wye in Wales vowed Monday to hang onto his crown, despite a weekend "referendum" in favor of toppling him. King Richard, bet ter known as Richard Booth, declared the Weish market town an independent kingdom - and himself the monarch - six years ago. He issued his own currency, set up customs posts and renamed his home Hay Castle. The 1,500 townspeople mostly shrugged and went about their business, the bulk of which was selling second-hand books, of which Hay — on the Welsh-English border — is a world center. The kingdom remained peaceable until Leon Morelli, TT London businessman who like Booth owns book shops in Hay, argued with him over the efforts of the Welsh Tourist Board and offen of government aid to bring in new industry. Booth, a traditionalist, wanted to reject both Morelli called a referendum, inviting locals nia. Earlier this year the 82-year-old Heifetz sued the university for to cast their votes by throwing allegedly reneging on promises to darts at a likeness of the monarch fund the program. He disputed a in a town pub. A bullseye won the thrower a glass of sherry. Morelli said a majority of those who voted over the weekend favored dethroning the king. But Booth disputed the results as unrepresentative.
